Subject Overview:	This subject presents the principles, concepts and methods needed to analyse an investment in an existing property, to analyse a potential property development and to raise private and public debt or capital for property investment. Discounted cash flows and real estate economics are the basis of these analyses. The subject introduces students to principles of rent and vacancy determination; the application of real estate market analysis to the investment decision; the financial analysis of properties; mortgage financing and the role of public debt taxation; and raising private capital for property.									
Objectives:	<p>On successful completion of this subject, students should be able to:</p> <ul style="list-style-type: none"> # Recognise the core determinants of property investment value and discuss their impact on a property investment or property development; 									

	<ul style="list-style-type: none"> # Evaluate and apply market information to derive a market analysis for an investment property or development; # Perform an investment analysis for an income producing property; # Perform a financial analysis of a single use and multiple use development project; # Explain the impact of alternate capital structures on the value and risk of an investment property or development; # Analyse the impact of taxes on a property investment; # Explain the various mechanisms for raising private and public equity for a property investment and determine their impact on the investment decision.
Assessment:	One 1-hour mid-semester test (20%) One 2-hour end-of-semester examination (50%) Assignments not exceeding 3000 words (30%)
