

ISYS90059 Information Systems Research Proj Minor

Credit Points:	37.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2013, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus.
Time Commitment:	Contact Hours: This subject is an individual research project and weekly contact hours will vary depending on the nature of the project. Total Time Commitment: Students should discuss this with their supervisor but as a guide, a student enrolled in a 50 point research project subject would be expected to be engaged in their research for an average of forty hours per week or 800 hours for the semester. Students enrolled in a 37.5, 25 or 12.5 point research subject would be expected to be engaged in their research on a pro-rata basis.
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Overview, Objectives, Assessment and Generic Skills sections of this entry. It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and the Disability Liaison Unit: http://www.services.unimelb.edu.au/disability/
Coordinator:	Assoc Prof Simon Milton
Contact:	Email: simon.milton@unimelb.edu.au (mailto:simon.milton@unimelb.edu.au)
Subject Overview:	Students undertake an original investigation of a topic relevant to Information Systems (or cognate discipline). Specific research projects will depend on the availability of appropriate expertise, but may address a range of issues within Information Systems research. Under the supervision and guidance of an academic researcher, students are required to design and conduct a research investigation. This would typically involve a literature review, data collection and data analysis. The results will be reported as a thesis and in a public presentation. In some instances, it is expected that the results will also be submitted for publication in a conference or journal.
Objectives:	On completion of this subject students should have: <ul style="list-style-type: none"> # A comprehensive understanding of the process and practice of research in Information Systems # A sophisticated understanding of the Information Systems discipline # Developed expertise in the area of their research project # Completed a substantial piece of original research; and # The necessary skills for further advanced research in Information Systems (e.g. in doctoral studies)

Assessment:	The assessment requirements below are applicable to the entire 50 point Research Project: (i) a thesis of no more than 12,000 words submitted at the end of the research (worth 100% of the overall score) and (ii) two oral presentations; one presentation at the project proposal stage and another presentation with final the report. Both presentations are hurdle requirements.
Prescribed Texts:	None
Recommended Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	On completion of this subject students should have developed generic skills in: <ul style="list-style-type: none"> # Conducting independent research # Analysing and synthesising technical research # Conducting critical evaluation of research # Communicating their research in scholarly reports and in public presentations; and # Time management and project management
Related Course(s):	Master of Science (Information Systems)
