

## MCEN90014 Materials

<b>Credit Points:</b>	12.50						
<b>Level:</b>	9 (Graduate/Postgraduate)						
<b>Dates &amp; Locations:</b>	This subject is not offered in 2013.						
<b>Time Commitment:</b>	Contact Hours: 36 hours of lectures, 9 hours of tutorials, and 4 hours of laboratory Total Time Commitment: 120 hrs						
<b>Prerequisites:</b>	<table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>MCEN30017 Mechanics &amp; Materials</td> <td>Not offered 2013</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	MCEN30017 Mechanics & Materials	Not offered 2013	12.50
Subject	Study Period Commencement:	Credit Points:					
MCEN30017 Mechanics & Materials	Not offered 2013	12.50					
<b>Corequisites:</b>	N/A						
<b>Recommended Background Knowledge:</b>	N/A						
<b>Non Allowed Subjects:</b>	None						
<b>Core Participation Requirements:</b>	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: <a href="http://www.services.unimelb.edu.au/disability/">http://www.services.unimelb.edu.au/disability/</a>						
<b>Contact:</b>	<b><a href="mailto:k.xia@unimelb.edu.au">k.xia@unimelb.edu.au</a> (mailto:k.xia@unimelb.edu.au)</b>						
<b>Subject Overview:</b>	This subject introduces the concept of microstructure and explores its relationship with processing and properties in the context of basic types of engineering materials and their applications. Topics covered include: diffusion, phase equilibrium and diagrams, phase transformation, metallic alloys, ceramics, polymers, composites, surface and other selected non-mechanical properties.						
<b>Objectives:</b>	At the conclusion of this subject students should be able to - <ul style="list-style-type: none"> <li>• Perform analysis of equilibrium phase diagrams and use transformation diagrams to deduce microstructures resulting from specific heat treatments</li> <li>• Relate processing, microstructure and properties</li> <li>• Describe various engineering materials and their application</li> </ul>						
<b>Assessment:</b>	One three-hour end of semester written examination (80%), and 2 laboratory sessions (20%) during the semester with reports (totalling not more than 4000 words) due throughout the semester. Attendance at the labs and submission of written lab reports as required are compulsory.						
<b>Prescribed Texts:</b>	Callister WD Jr, Materials Science and Engineering – an Introduction.						
<b>Recommended Texts:</b>	N/A						
<b>Breadth Options:</b>	This subject is not available as a breadth subject.						
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>						
<b>Generic Skills:</b>	<ul style="list-style-type: none"> <li># Ability to apply knowledge of science and engineering fundamentals</li> <li># Ability to undertake problem identification, formulation, and solution</li> </ul>						

	<ul style="list-style-type: none"><li># Ability to utilise a systems approach to complex problems and to design and operational performance</li><li># Ability to communicate effectively, with the engineering team and with the community at large</li></ul>
<b>Related Majors/Minors/ Specialisations:</b>	B-ENG Mechanical Engineering stream Master of Engineering (Mechanical)
