Subject Overview:	This subject draws together essential elements of curriculum design – planning, resourcing, recruitment, selection, development, implementation, assessment and evaluation. Participants will review existing programs with respect to theoretical underpinning, educational methods and structure. Participants will be expected to design a component of a surgical training program using best educational practice. The overall aims of the subject are: <ul style="list-style-type: none"> • To identify best practice in curriculum design • To apply sound curriculum design principles in a surgical training program • To explore basic principles of assessment 									
Objectives:	After completing the subject participants will be able to:									
Assessment:	Essay (Educational program design for surgical training) 2000 words (mid semester) 50%. The aim of this assessment is to progress knowledge of skills assessed in subject 2. That is, this assessment moves away from reporting and reflecting on the 'micro' teaching session plan (Subject 2) to the higher-level of the program/curriculum. Students are encouraged to design curriculum aligned with their actual practice. Reflective writing (Hurdle assessment) 1500 words									

	(mid semester), Students are expected to reflect on an existing curriculum highlighting strengths and areas for development by drawing on the theoretical materials presented in the subject. Essay – 2000 words (end of semester) 50%. The aim of this assessment is to explore in detail an element of assessment in surgical education. This is a critical element of professional educational activity and will enable participants to develop a deep understanding of at least one facet of high stakes assessment. Assessment in the context of surgical practice has high stakes for not only the surgical trainee but for patients too. It is essential that surgical educators have a deep understanding of assessment methods for those seeking to work in a high risk environment such as surgery.
Prescribed Texts:	Reading materials online
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<ul style="list-style-type: none"> # Understand how assessment is used to complement curriculum design # Be able to develop basic curriculum # Study skills related to a range of educational methods # Academic reading skills # Academic writing # Applying theory to practice # Reference manager skills # Work effectively within a small group # Learn independently
