<b>Subject Overview:</b>	This subject examines the rise of the new information technologies within a wider organisational, social and historical context. It relates them to the emergence of "information-based" societies, where work, organisations and society are said to be changing. In particular, it examines some of the competing claims made about such developments and examines the actual impacts of new information technologies on a range of issues that may include work organisation and behaviour, culture, power and knowledge. It also looks at the broader social and ethical implications for the wider society and globalisation.
<b>Objectives:</b>	On successful completion of this subject, students should be able to: <ul style="list-style-type: none"> <li># Explain the emergence of information technology and e-business in a wider context;</li> <li># Be able to analyse and evaluate the different effects that they have on organisations and societies;</li> <li># Be capable of applying critical management theory, including the effects of power, culture and knowledge, to real and hypothetical situations.</li> </ul>
