Subject Overview:	This subject covers key frameworks for making complex business decisions and implementing using the philosophy and techniques of project management. It specifically covers an in-depth study of decision trees and risk analysis, followed by decision implementation and organisation. Case studies relating to supply chain management will be used to develop applied knowledge of how to use these procedures to formulate and implement strategy in supply chains. Project management concepts and applications are developed as the powerful approach for managing strategy implementation, change management and facilities development. Project management philosophies and techniques are applied to supply chain design and implementation.
Objectives:	At the completion of the subject, students should have the: <ul style="list-style-type: none"> • Ability to use decision trees to support complex business and supply chain decisions • Ability to translate a piece of supply chain strategy into a project format • Theory and practice of decision making when complexity is present • Knowledge of how to use project management approaches and tools to manage implementation
Assessment:	20% - 1 hour exam, completed on the final day of delivery 30% - 1,500 word assignment, due four weeks after the delivery 50% - 3,000 word field project, due eight weeks after the delivery
Prescribed Texts:	nil
Recommended Texts:	Nil
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
