Subject Overview:	<p>This subject builds on 'Indigenous Research' (MULT90022), the core subject in the Professional Certificate in Indigenous Research, successful completion of which is a prerequisite for entry to this subject.</p> <p>It is expected that participants will be near completion of, or have recently completed, their Research Higher Degree (RHD, and that they are now in a position to develop leadership skills and capacity in, or involving, research. In this subject, Indigenous research is defined as research carried out - in any discipline area - by students who are of Aboriginal or Torres Strait Islander descent. It may also include research by RHD students (of any background) whose research is on Indigenous topics. A quota, and selection criteria, will apply.</p> <p>The curriculum is underpinned by Indigenous perspectives. Participants will develop leadership skills relevant to academic contexts such as research supervision; research grants and project management; and the mentoring of junior researchers, especially Indigenous. They will also develop skills – individually and collaboratively - in applying research findings and/or an evidence base to issues arising in professional, community and industry contexts.</p> <p>Assessment includes an individual verbal presentation; a short group project; and a longer individual research project tailored to the participant's work context and career.</p>								
Objectives:	To provide a supportive cohort experience, and a culturally appropriate learning environment, with opportunities to develop high-level professional skills and aptitudes, for students aspiring to become leaders in Indigenous research.								

	<p>To facilitate the establishment and strengthening of professional and/or academic networks. To build leadership capacity in areas such as supervision, publication, grants, and project management, especially in relation to the mentoring of Indigenous students and early career researchers.</p> <p>To enable potential leaders in Indigenous research to:</p> <ul style="list-style-type: none"> # tackle complex issues in Indigenous research and resolve them by applying a sophisticated awareness of Indigenous perspectives; # develop the capacity to influence the ethical conducting of Indigenous research; # develop the ability to influence both Indigenous research policy, and the application of research in policy contexts beyond universities; # demonstrate high-level competence in professional presentation of research, both verbally and in writing; # undertake a research project directly relevant to the student's professional or academic context.
Assessment:	<p>A verbal 20 minute presentation (hurdle requirement) to be held on the 17th July, 2013, which is the final day of intensive (10%) Group Project, 2000 words. Begun during intensive, due on the 30th August, 2013, which is 6 weeks after intensive program (20%) An individual research project, 5000 words, topic to be individually negotiated and due on the 4th October, 2013 (70%)</p>
Prescribed Texts:	All course materials will be supplied.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>Graduates will be expected to:</p> <ul style="list-style-type: none"> # have a sophisticated awareness of and respect for Indigenous knowledge, cultures and values # contribute constructively to change in communities, professions and workplaces, including academic # have excellent interpersonal, collaborative and decision-making skills # be able to mentor future generations of Indigenous scholars and researchers # draw on research to contribute to public policy discourse, with a profound awareness of Indigenous community needs # be able to utilise research in order to fulfil social, civic and community responsibilities and problem-solving # have a high regard for human rights, equity and ethics in relation to Indigenous research
