

# OPTO90023 Applied Clinical Training

<b>Credit Points:</b>	75									
<b>Level:</b>	9 (Graduate/Postgraduate)									
<b>Dates &amp; Locations:</b>	This subject is not offered in 2013.									
<b>Time Commitment:</b>	Contact Hours: Sem 1: 9 x 1-hour lectures/seminars per week, 9 hours of clinical work, practicals, tutorials and computer-assisted tasks per week. Sem 2: 8 x 1-hour lectures/seminars per week, 9 hours of clinical work, practicals, tutorials and computer-assisted tasks per week. Total Time Commitment: Estimated total time commitment - 720 hours									
<b>Prerequisites:</b>	<table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>OPTO90027 Integrated Ophthalmic Sciences</td> <td>Not offered 2013</td> <td>75</td> </tr> <tr> <td>OPTO90024 Preclinical Optometry</td> <td>Not offered 2013</td> <td>25</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	OPTO90027 Integrated Ophthalmic Sciences	Not offered 2013	75	OPTO90024 Preclinical Optometry	Not offered 2013	25
Subject	Study Period Commencement:	Credit Points:								
OPTO90027 Integrated Ophthalmic Sciences	Not offered 2013	75								
OPTO90024 Preclinical Optometry	Not offered 2013	25								
<b>Corequisites:</b>	<table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>OPTO90025 Research Studies in Vision and Optometry</td> <td>Not offered 2013</td> <td>25</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	OPTO90025 Research Studies in Vision and Optometry	Not offered 2013	25			
Subject	Study Period Commencement:	Credit Points:								
OPTO90025 Research Studies in Vision and Optometry	Not offered 2013	25								
<b>Recommended Background Knowledge:</b>	None									
<b>Non Allowed Subjects:</b>	None									
<b>Core Participation Requirements:</b>	For the purposes of considering requests for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements for this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: <a href="http://www.services.unimelb.edu.au/disability/">http://www.services.unimelb.edu.au/disability/</a>									
<b>Contact:</b>	Email: <a href="mailto:bvb@unimelb.edu.au">bvb@unimelb.edu.au</a> ( <a href="mailto:bvb@unimelb.edu.au">mailto:bvb@unimelb.edu.au</a> )									
<b>Subject Overview:</b>	<p>Note: This subject is only available to students enrolled in the Doctor of Optometry.</p> <p>Students will develop, and then apply, an advanced knowledge of the clinical vision sciences, as relevant to the full scope of evidence-based practice in optometry. Study of ocular and neurological disease processes, along with pharmacology and microbiology, will be integrated with and applied to clinical practice through studying the diagnosis and management of ocular disease. To complement this, students will learn the theory of advanced clinical diagnostic tests and corrective devices, such as contact lenses and spectacle lenses, thus equipping them to both investigate and manage a patient in clinical practice. Throughout this subject, students will constantly be required to integrate their learning, firstly through consolidation of their clinical routine and the practice of advanced clinical techniques, and then through application of these skills in the examination and management of patients in a clinical setting. Integration will also occur through the exploration of case studies that link key topics of basic sciences and clinical practice. Additionally, students will work, both on-line and face-to-face, in small groups to explore the scientific and clinical interface of clinical cases.</p>									
<b>Objectives:</b>	<p>On completion of this subject students should have:</p> <ul style="list-style-type: none"> <li># developed an understanding of the mechanisms and associated manifestations of ocular and visual system disease at a level that allows students to construct appropriate differential diagnoses, and arrive at definitive diagnoses;</li> </ul>									

	<ul style="list-style-type: none"> <li># developed a knowledge of microbiologic principles, mechanisms and side-effects of drug action, and best practice therapeutic management strategies to enable the safe and effective use of ocular therapeutic drugs;</li> <li># fostered competency in clinical ocular examination using current best-practice methods, enabling students to fully assess and the health and visual performance of their patient;</li> <li># developed the ability to identify, key links between the basic sciences and clinical practice and begun to appreciate the importance of these links; and</li> <li># continued their development of the skills and knowledge necessary for the practise of optometry.</li> </ul>
<b>Assessment:</b>	One 3-hour written examination (semester 1 examination period): 40% One 3-hour written examination (semester 2 examination period): 40% Two 40-minute group seminar presentations (throughout year): 10% Clinical performance (throughout year): 10% Hurdle requirements: Satisfactory performance in competency assessments, typically stream-specific written examinations and clinical proficiency examinations (throughout year) 100% attendance at clinical placements
<b>Prescribed Texts:</b>	A reading list will be provided.
<b>Breadth Options:</b>	This subject is not available as a breadth subject.
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>
<b>Generic Skills:</b>	<p>On completion of this subject students should:</p> <ul style="list-style-type: none"> <li># be able to evaluate scientific literature as a foundation to evidence based practice;</li> <li># be able to develop new concepts of how to manage clinical problems based on new knowledge obtained;</li> <li># be able to integrate knowledge from different domains and articulate knowledge and understanding in written and oral forms;</li> <li># value the collection and recording of accurate and complete data;</li> <li># be able to teach and learn from their peers, and to reflect upon and evaluate the benefits of their learning activities; and</li> <li># be able to work with colleagues to develop the common goal of best practice in the delivery of eye care.</li> </ul>
