

PAED90024 Rural Paediatric Theory and Context

Credit Points:	12.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	This subject is not offered in 2013. The course will be delivered at the Echuca Regional Health Education Centre at the Echuca Regional Hospital. The location of clinical placements will be discussed and selected in consultation with individual students and will be based on their professional needs.
Time Commitment:	Contact Hours: 24 hours of lectures, 8 hours presentations and 16 hours online learning Total Time Commitment: In addition to face-to-face teaching time of 32 hours and 16 hours online learning, students should expect to undertake a minimum of 120 hours research, reading, writing and general study to complete this subject successfully.
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	For the purposes of considering requests for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Contact:	School of Melbourne Custom Programs Level 3, 442 Auburn Road Hawthorn VIC 3122 Phone - 03 9810 3245 Email - postgrad@commercial.unimelb.edu.au (mailto:postgrad@commercial.unimelb.edu.au)
Subject Overview:	The theory and context of rural paediatrics will examine the key concepts underpinning rural health practice; recognise multidisciplinary rural health services in primary care; and understand and apply theories of child development. The context in rural paediatrics comprises understanding rural paediatric health services, the principles of family centred practice and improving cultural literacy, including indigenous, under-resourced or culturally diverse child populations. The three topics in child development in a family centred context are: understanding the infant (introduction to foetal and system development, infant development and developmental delay, communication and behaviour); understanding the child (children at school and in sport, and variations in child development); and communicating with the adolescent (growth, puberty, compliance and mental health). The subject will extend the student's clinical reasoning, learning and understanding of challenges of environmental issues and disability. Specific conditions are case based. Students will present on one of the topics as part of the course.
Objectives:	By the end of this subject, students will have had the opportunity to; <ul style="list-style-type: none"> # Develop a conceptual understanding of rural health practice # Gain insight into multidisciplinary approaches to health in assessment of infants, children and adolescents using principles of family centred practice # Appreciate the context and improve cultural literacy in rural paediatrics including in indigenous health and child populations where there is cultural diversity # Establish a deeper understanding and knowledge of the typically developing infant, child and adolescent and some variations # Demonstrate communication, assessment and presentation skills in relation to infants, children, adolescents, families and multidisciplinary health professionals

Assessment:	One 30 minute class presentation (40%) during the intensive teaching period, One written assignment – 4000 words (60%) due at the end of semester
Prescribed Texts:	Nil
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>The generic skills obtained by successfully completing this subject include:</p> <ul style="list-style-type: none"> # a capacity for self-directed learning and the motivation for life-long independent learning. # an advanced level of oral and written communication. # an ability to critically evaluate and synthesise research literature. # a capacity to manage competing demands on time. # an appreciation of the team approach to learning in complex areas.
