

PHYC90013 Condensed Matter Physics

Credit Points:	12.50																	
Level:	9 (Graduate/Postgraduate)																	
Dates & Locations:	This subject is not offered in 2013.																	
Time Commitment:	Contact Hours: 36 hours comprising 3 one-hour lectures/week. Total Time Commitment: Not available																	
Prerequisites:	<table><tr><th>Subject</th><th>Study Period Commencement:</th><th>Credit Points:</th></tr><tr><td>PHYC90007 Quantum Mechanics</td><td>Not offered 2013</td><td>12.50</td></tr><tr><td>PHYC90008 Quantum Field Theory</td><td>Not offered 2013</td><td>12.50</td></tr></table> and a third-year subject in statistical physics equivalent to <table><tr><th>Subject</th><th>Study Period Commencement:</th><th>Credit Points:</th></tr><tr><td>PHYC30017 Statistical Physics</td><td>Not offered 2013</td><td>12.50</td></tr></table>			Subject	Study Period Commencement:	Credit Points:	PHYC90007 Quantum Mechanics	Not offered 2013	12.50	PHYC90008 Quantum Field Theory	Not offered 2013	12.50	Subject	Study Period Commencement:	Credit Points:	PHYC30017 Statistical Physics	Not offered 2013	12.50

Corequisites:	None																	
Recommended Background Knowledge:	None																	
Non Allowed Subjects:	None																	
Core Participation Requirements:	It is University policy to take all reasonable steps to minimise the impact of disability upon academic study and reasonable steps will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact upon their active and safe participation in a subject are encouraged to discuss this with the relevant subject coordinator and the Disability Liaison Unit.																	
Contact:	Email: msc@physics.unimelb.edu.au (mailto:msc@physics.unimelb.edu.au)																	
Subject Overview:	This subject provides an advanced introduction to condensed matter physics. The general topics covered are (i) experimental and theoretical aspects of the characterisation of condensed matter using electrons and x-rays and (ii) the quantum model of solids and its relevance to semiconductor and mesoscopic physics. Specific topics covered may include: (i) the imaging of condensed matter at the atomic level and (ii) the determination of how atoms are bonded; (iii) application of imaging beyond the nanoscale; (iv) magnetism; (v) superconductivity; (vi) the properties of semiconductor devices and (vii) mesoscopic systems.																	
Objectives:	The objectives of this subject are: <ul style="list-style-type: none"># To challenge the students to expand their knowledge of condensed matter physics and provide a foundation for further advanced studies.# To broaden their appreciation of how condensed matter physics integrates into the discipline of physics overall.# To develop a deep understanding of how condensed matter is characterised on the atomic scale.# To understand the role of quantum effects in micro- and meso-scopic systems and acquire a fundamental understanding of a range of physical phenomena in condensed matter systems.																	
Assessment:	Two assignments totalling up to 36 pages of written work (20%), spaced equally during the semester. One four-hour end-of-semester written examination (80%).																	

Prescribed Texts:	None
Recommended Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>At the completion of this subject, students should have gained skills in:</p> <ul style="list-style-type: none"> # analysing how to solve a problem by applying simple fundamental laws to more complicated situations; # applying abstract concepts to real-world situations; # solving relatively complicated problems using approximations; # participating as an effective member of a group in discussions and collaborative assignments; # managing time effectively in order to be prepared for group discussions and undertake the assignments and exam.
Related Course(s):	Master of Science (Physics)
Related Majors/Minors/ Specialisations:	Physics
