Subject Overview:	<p>This subject explores two main themes:</p> <ol style="list-style-type: none"> 1. The social construction of sexuality - how our understandings of sexuality are developed in socio-cultural contexts; and 2. Sexual health - how it is defined and measured, what factors contribute to it, and practical issues to consider when interacting with adolescents and trying to have an impact on their sexual health and wellbeing.
Objectives:	<p>On completion of the subject students will be able to:</p> <ul style="list-style-type: none"> # demonstrate an understanding of the breadth, depth and diversity of adolescent sexuality; # demonstrate an understanding of some of the historical aspects of the study and social construction of sexuality; # identify the current understanding of the indicators of and influences on adolescent sexuality and sexual health in Australia; # demonstrate a sound knowledge of the skills necessary to successfully work with and engage adolescents who have sexual health concerns. # devise developmentally appropriate health promotion strategies related to young people and sexual health; # critically appraise debates and discussions around the sexual health of young people;

	# demonstrate an understanding and knowledge of the factors impacting on young peoples' decision making around their sexual behaviour and sexuality;
Assessment:	Group presentation (approx 5 mins per person) held on the last day of the 5 day intensive - 30% A 3000-3500 word essay due at the end of April - 70%
