Subject Overview:	This subject expands on the themes developed in <i>VETS30011 Animal Disease Biotechnology 1</i> , and introduces students to the concepts of zoonosis and the role of animal health surveillance in maintaining the health of human populations. The subject may include industry placements, with opportunities to develop laboratory skills in areas such as haematology, biochemistry, serology, microbiology, molecular biology, anatomic pathology and toxicology.								
Objectives:	This course aims to prepare students for careers in animal health and disease surveillance. Its objectives are to equip students with an understanding of techniques used to assess the health of individual animals and populations of animals, as well as an understanding of the biological basis of these tests. Students satisfactorily completing this course will also acquire skills in performing a range of laboratory tests used in monitoring the health of populations of animals.								
Assessment:	a 2-hour end-of-semester examination (75%) assessment of laboratory based exercises (tests and report writing) (25%)								
Prescribed Texts:	None								
Breadth Options:	This subject is not available as a breadth subject.								
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees								
Related Majors/Minors/ Specialisations:	Animal Disease Biotechnology (specialisation of Animal Health and Disease major) Science-credited subjects - new generation B-SCI and B-ENG. Core selective subjects for B-BMED.
