Overview:	<p>Primary care refers to the care a patient receives upon first contact with the health care system, before referral elsewhere within the system, as well as the care received after exiting hospital. The aim of primary care is to provide the patient with a broad spectrum of preventive and curative care over a period of time as well as to coordinate all of the care the patient receives. Primary care research is multidisciplinary and aims to improve the evidence base for best practice in the primary care setting. This specialisation will allow a focus on the aspects of research method which are particular to primary care research or on a content area of particular relevance to this setting.</p>																				
Learning Outcomes:	-																				
Structure & Available Subjects:	<p>Standard 200 Point Program (no Advanced Standing): FIVE core subjects and TEN elective subjects and the Capstone Selective POPH90227 Public Health in Practice OR FIVE core subjects, NINE elective subjects and either a Research Project or Professional Practice unit</p> <p>Students granted 25 Credit Points Advanced Standing: FIVE core subjects and EIGHT elective subjects and the Capstone Selective POPH90227 Public Health in Practice OR FIVE core subjects, SEVEN elective subjects and either a Research Project or Professional Practice unit</p> <p>Students granted 50 Credit Points Advanced Standing: FOUR core subjects and SEVEN elective subjects and the Capstone Selective POPH90227 Public Health in Practice OR FOUR core subjects and EIGHT elective subjects and either a Research Project or Professional Practice unit</p>

Subject	Study Period Commencement:	Credit Points:																			
POPH90217 Foundations of Public Health	February	12.50																			
POPH90013 Biostatistics	Semester 1	12.50																			
POPH90014 Introduction to Epidemiology	Semester 1	12.50																			
POPH90231 Surveys and Qualitative Methods	Semester 2	12.50																			
POPH90218 Public Health Leadership and Management	August	12.50																			

Students may apply to enrol in a Research Project in Primary Health Care. Students entering the Master of Public Health from 2011 must have a weighted average mark of at least 70% for all relevant subjects to be eligible to enrol in the research project. Successful research project applicants will be selected on the basis of academic merit.

Those students who do undertake (or are currently enrolled in) the Research Project please note the following important information:

- # Students who have already completed one semester of their Research Project will be completing their project over two semester's (12.5 points per semester) so please enroll in the remaining semester.
- # Students who have not commenced their Research Project have the option of applying to enrol in a year-long research project or a semester-long research project.

Subject	Study Period Commencement:	Credit Points:
GENP90001 Research Project in Primary Health Care	Semester 1, Semester 2	12.50
GENP90020 Research Project: Primary Health Care	Semester 1, Semester 2	25

Related Course(s):	Master of Public Health
