

Veterinary Bioscience (specialisation of Animal Health and Disease major)

Year and Campus:	2014																										
Coordinator:	Associate Professor Elizabeth Tudor																										
Contact:	etudor@unimelb.edu.au (mailto:etudor@unimelb.edu.au)																										
Overview:	<p>Veterinary Bioscience specialisation within the Animal Health and Disease major</p> <p>The Veterinary Bioscience specialisation is only available to students who have received a provisional/conditional course offer to commence the Doctor of Veterinary Medicine following successful completion of the Bachelor of Science. The approval of the Faculty of Veterinary Science is required to enrol into all subjects in this specialisation (except for VETS30015 Veterinary Bioscience: Cells to Systems).</p> <p>Science students should not select this specialisation as part of their study plan during re-enrolment. This specialisation will be added to the study plans of approved students by the Student Centre.</p>																										
Learning Outcomes:	See Animal Health and Disease major																										
Structure & Available Subjects:	<p>Completion of 50 points of study at Level 3.</p> <p>This specialisation of the Animal Health and Disease major is formally defined as 50 points of study at Level 3. However two additional Level 3 subjects are required for students who have received a provisional/conditional offer for the Doctor of Veterinary Medicine. Students must complete all six 12.5 point Level 3 subjects listed below and the Bachelor of Science course overall to satisfy the conditions of their course offer into the DVM.</p>																										
Subject Options:	<p>All four of</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>VETS30015 Veterinary Bioscience: Cells to Systems</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>VETS30016 Veterinary Bioscience: Digestive System</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>VETS30017 Veterinary Bioscience: Metab & Excretion</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>VETS30014 Veterinary Bioscience: Cardiovasc System</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table> <p>In addition to the four subjects listed above, the following two Level 3 subjects are also prerequisites for progression to the DVM and must also be taken by students completing this specialisation.</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>VETS30018 Veterinary Bioscience:Respiratory System</td> <td>Semester 2</td> <td>12.50</td> </tr> <tr> <td>VETS30013 Animal Health in Production Systems</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table>			Subject	Study Period Commencement:	Credit Points:	VETS30015 Veterinary Bioscience: Cells to Systems	Semester 1	12.50	VETS30016 Veterinary Bioscience: Digestive System	Semester 1	12.50	VETS30017 Veterinary Bioscience: Metab & Excretion	Semester 1	12.50	VETS30014 Veterinary Bioscience: Cardiovasc System	Semester 2	12.50	Subject	Study Period Commencement:	Credit Points:	VETS30018 Veterinary Bioscience:Respiratory System	Semester 2	12.50	VETS30013 Animal Health in Production Systems	Semester 2	12.50
