<b>Subject Overview:</b>	This subject addresses what risk management is, why companies engage in risk management, and the tools available to manage risk. As part of this, the subject provides an introduction to basic derivative securities such as forward and futures contracts, options, interest rate and currency swaps, and credit derivatives. We deal with the issue of pricing derivative securities by simple arbitrage arguments, and develop a framework for analyzing and using financial derivatives in various applications. While the study of derivative securities is inherently quantitative, the subject also focuses on economic intuitions and interpretations behind derivative securities.
<b>Learning Outcomes:</b>	<p>On completion of this subject, students should be able to:</p> <ul style="list-style-type: none"> <li># Assess and measure the financial risk of commercial/industrial companies</li> <li># Price future contracts</li> <li># Price derivative contracts</li> <li># Price swap contracts</li> <li># Price credit derivatives</li> <li># Price executive stock options</li> <li># Use derivative securities to manage the financial risk of commercial/industrial companies</li> </ul>
<b>Assessment:</b>	Contribution to class learning (10%) Throughout subject Midterm test (10%) 1 hour Middle of subject 2 Syndicate assignments (10%) each equivalent to individual 250-word assessment Staggered throughout subject Syndicate assignment (15%) equivalent to individual 750-word assessment End of subject Final examination (50%) Hurdle requirement 3 hours End of subject
<b>Prescribed Texts:</b>	None
<b>Breadth Options:</b>	This subject is not available as a breadth subject.
