

DASC20010 Applied Animal Physiology

Credit Points:	12.50
Level:	2 (Undergraduate)
Dates & Locations:	This subject is not offered in 2014.
Time Commitment:	Contact Hours: 72 hours Total Time Commitment: Contact hours 72. Estimated total time commitment (including non-contact time): 120 hours
Prerequisites:	Biology at 100 level.
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Contact:	Melbourne School of Land & Environment Student Centre Ground Floor, Melbourne School of Land & Environment (building 142) <i>Enquiries</i> Phone: 13 MELB (13 6352) Email: 13MELB@unimelb.edu.au (mailto:13MELB@unimelb.edu.au)
Subject Overview:	Physiology is the integrative study of the control of normal body function. This subject will examine the functions of different cell types and their interactions in organs and tissues; mechanisms by which organs are controlled and their functions are regulated; thermoregulatory processes and fluid balance; the physiology of the nervous system, of digestion, circulation, respiration, and excretion; the processes of growth and development, reproduction and lactation, and factors that can be manipulated to alter animal performance under normal conditions.
Learning Outcomes:	On completion of this subject students should be aware: # the working knowledge of structure and normal physiological function of domestic animals # the terminology and basic principles of structure and function in animals # functions of different cell types and their interactions in organs and tissues # mechanisms by which organ systems are controlled and functions coordinated # the physiology of the nervous system, of digestion, circulation, respiration, and excretion # the processes of growth, reproduction and lactation, and # differences in animal performance relating to physiological factors.
Assessment:	Two hour final examination (60%), one hour mid semester examination (10%), and practical work submitted during the semester, equivalent to 3,000 words (30%).
Prescribed Texts:	Animal Physiology: From Genes to Organisms (Sherwood, Klandorf and Yancey 2005 or 2012)
Breadth Options:	This subject potentially can be taken as a breadth subject component for the following courses: # Bachelor of Arts (https://handbook.unimelb.edu.au/view/2014/B-ARTS) # Bachelor of Commerce (https://handbook.unimelb.edu.au/view/2014/B-COM) # Bachelor of Environments (https://handbook.unimelb.edu.au/view/2014/B-ENVS)

	# Bachelor of Music (https://handbook.unimelb.edu.au/view/2014/B-MUS) You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	On completion of the subject the students should have developed the following generic skills: Academic excellence, greater in-depth understanding of scientific disciplines and of the practical and ethical aspects of working in animal physiology. The student's flexibility and level of transferable skills should be enhanced through improved time management and enhanced ability to communicate their ideas effectively in both written and verbal formats.
Notes:	This subject is available for science credit to students enrolled in the BSc (new degree only). Q Fever Students enrolling in the Melbourne School of Land and Environment are advised that some courses of study may put them at an increased risk of contracting Q Fever. Q Fever is a relatively common preventable condition which, while rarely fatal, can cause a severe acute illness and can result in damage to heart valves and chronic fatigue. It is recommended that students consider undertaking screening and vaccination for Q Fever prior to commencement of study. Students may be required to provide proof of vaccination prior to undertaking some coursework. Your course coordinator will advise you of this requirement prior to commencement of the study semester. Vaccine costs for students are not covered by the Pharmaceutical Benefit Scheme, Medicare, or by the University. Some students with full private medical coverage (which has hospital and ancillary cover) may receive partial re-imbursement for vaccine costs. http://www.land-environment.unimelb.edu.au/current-students/your-subjects/q-fever-information.html (http://www.land-environment.unimelb.edu.au/current-students/your-subjects/q-fever-information.html)
Related Majors/Minors/Specialisations:	Production Animal Health Science-credited subjects - new generation B-SCI and B-ENG. Selective subjects for B-BMED Sustainable Production
