

DASC30014 Animal Performance

Credit Points:	12.50																		
Level:	3 (Undergraduate)																		
Dates & Locations:	This subject is not offered in 2014.																		
Time Commitment:	Contact Hours: 24 hours lectures, up to 12 hours tutorials and prescribed reading up to 24 hours practical work Total Time Commitment: 60 hours in a total of 120 hours																		
Prerequisites:	<p>A physiology subject at 200 level such as:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>DASC20010 Applied Animal Physiology</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	DASC20010 Applied Animal Physiology	Semester 2	12.50												
Subject	Study Period Commencement:	Credit Points:																	
DASC20010 Applied Animal Physiology	Semester 2	12.50																	
Corequisites:	None																		
Recommended Background Knowledge:	<p>Recommended Background Knowledge:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>DASC20012 Comparative Nutrition and Digestion</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>DASC20010 Applied Animal Physiology</td> <td>Semester 2</td> <td>12.50</td> </tr> <tr> <td>DASC20011 Companion Animal Biology</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>DASC20013 Topics in Animal Health</td> <td>Semester 2</td> <td>12.50</td> </tr> <tr> <td>ECOL20003 Ecology</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	DASC20012 Comparative Nutrition and Digestion	Semester 1	12.50	DASC20010 Applied Animal Physiology	Semester 2	12.50	DASC20011 Companion Animal Biology	Semester 1	12.50	DASC20013 Topics in Animal Health	Semester 2	12.50	ECOL20003 Ecology	Semester 2	12.50
Subject	Study Period Commencement:	Credit Points:																	
DASC20012 Comparative Nutrition and Digestion	Semester 1	12.50																	
DASC20010 Applied Animal Physiology	Semester 2	12.50																	
DASC20011 Companion Animal Biology	Semester 1	12.50																	
DASC20013 Topics in Animal Health	Semester 2	12.50																	
ECOL20003 Ecology	Semester 2	12.50																	
Non Allowed Subjects:	None																		
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/																		
Contact:	<p>Melbourne School of Land & Environment Student Centre Ground Floor, Melbourne School of Land & Environment (building 142)</p> <p><i>Enquiries</i> Phone: 13 MELB (13 6352) Email: 13MELB@unimelb.edu.au (mailto:13MELB@unimelb.edu.au)</p>																		
Subject Overview:	<p>The aim of this subject is to enable students to develop skills and knowledge in exercise and environmental physiology in domestic and companion animals and to be able to apply this knowledge in management of the environment for improved animal performance.</p> <p>The content includes a comparative overview of basic physiological processes important in exercise physiology and environmental adaptation such as circulation, gas exchange, electrolytes and water balance, heat production and thermoregulation; physiological and metabolic adaptations during exercise and training, including environmental effects on training management; diversity in environments and the nature of stress, including physical, psychological and nutritional factors; animal health specifically related to animal performance; and management of the environment including aspects of housing.</p>																		
Learning Outcomes:	At the completion of this subject students should be able to:																		

	<ul style="list-style-type: none"> # understand how different animals cope with changing and diverse environments; # understand the nature of stress and stressful environments; # understand the nature of physiological regulation and adaptation; # understand how management can influence the animal-environment interaction; and have developed experimental skills to study animal-environment interactions; # understand the biomechanics of, and the physiological and metabolic adaptations occurring during, training and exercise # understand the effects of environment on training management # Understand the implications for animal health of improving animal performance
Assessment:	One written assignment of not more than 1000 words (20% of final marks, due mid-semester), two written practical reports of not more than 1000 words each (20%), one written essay or short-answer style examination up to 2 hours (60% of final marks, end of semester).
Prescribed Texts:	N/A
Breadth Options:	<p>This subject potentially can be taken as a breadth subject component for the following courses:</p> <ul style="list-style-type: none"> # Bachelor of Arts (https://handbook.unimelb.edu.au/view/2014/B-ARTS) # Bachelor of Commerce (https://handbook.unimelb.edu.au/view/2014/B-COM) # Bachelor of Environments (https://handbook.unimelb.edu.au/view/2014/B-ENVS) # Bachelor of Music (https://handbook.unimelb.edu.au/view/2014/B-MUS) <p>You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.</p>
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	On completion of the subject the students should have developed the following generic skills: Academic excellence, greater in-depth understanding of scientific disciplines of animal physiology and performance in a range of species. The student's flexibility and level of transferable skills should be enhanced through improved time management and enhanced ability to communicate their ideas effectively in both written and verbal formats.
Notes:	<p>Q Fever</p> <p>Students enrolling in the Melbourne School of Land and Environment are advised that some courses of study may put them at an increased risk of contracting Q Fever. Q Fever is a relatively common preventable condition which, while rarely fatal, can cause a severe acute illness and can result in damage to heart valves and chronic fatigue. It is recommended that students consider undertaking screening and vaccination for Q Fever prior to commencement of study. Students may be required to provide proof of vaccination prior to undertaking some coursework. Your course coordinator will advise you of this requirement prior to commencement of the study semester. Vaccine costs for students are not covered by the Pharmaceutical Benefit Scheme, Medicare, or by the University. Some students with full private medical coverage (which has hospital and ancillary cover) may receive partial re-imbusement for vaccine costs.</p> <p>http://www.land-environment.unimelb.edu.au/current-students/your-subjects/q-fever-information.html (http://www.land-environment.unimelb.edu.au/current-students/your-subjects/q-fever-information.html)</p>
Related Majors/Minors/Specialisations:	Animal Science and Management Science-credited subjects - new generation B-SCI and B-ENG. Selective subjects for B-BMED
