Subject Overview:	The subject explores the complex educational relationship between, coach, athlete, coaching program and social context, and encourages students to develop an open and reflective approach to their own coaching practice. It offers a deeper insight into the theory and practice of sports coaching highlighting the pedagogical and scientific concepts underpinning good coaching practice. It addresses key issues such as: viewing the athlete as a learner; instructional methods and reflection; how analysis of ability informs assessment; and how the various sports science sub-disciplines can be used to enhance athletic performance. Students will be expected to apply the theoretical knowledge learnt in this subject through the development, implementation and evaluation of teaching and coaching programs that they have designed for their specific sport setting. The subject is aimed at those students who have proven coaching experience and a current association with a sporting club or school organisation.						
Learning Outcomes:	<ul style="list-style-type: none"> # Understand the importance of sports science sub-disciplines and their use in modern coaching; # Interpret scientific test data to assess the strengths and weaknesses of an athlete;
