Subject Overview:	This subject uses contemporary research in oral language acquisition to develop frameworks that primary school educators can use to describe, monitor and teach speaking and listening knowledge and skills. The frameworks provide educators with the capacity to identify the complexity of the ideas communicated, the language conventions used, the knowledge of the purposes of communicating to achieve social goals and the ability to learn oral language. It will examine procedures for monitoring oral language development and use and analyse various assessment and diagnostic tools. It will also examine pedagogy associated with oral language education and a range of intervention strategies in speaking and listening. The links between oral language knowledge and skills and academic success in literacy and numeracy will be explored throughout the subject.
Learning Outcomes:	<p>On completion of this subject students should be able to:</p> <ul style="list-style-type: none"> # describe and evaluate frameworks that primary school teachers can use to describe the oral communication skills of students in terms of the ideas, conventions and purposes for communicating; # describe developmental trends to acquiring speaking and listening knowledge and skills in terms of these models and use these to monitor student use and learning; # use these models to assess and diagnose the speaking and listening skills of primary school students, discuss and evaluate procedures for diagnosing and reporting difficulties in the context of the regular classroom; # use the frameworks to plan and implement education programmes in speaking and listening that are supported by current research; # discuss the characteristics of successful oral language instructional programs according to particular speaking and listening needs, evaluate the effectiveness of education programs intended for use with students who have oral language learning difficulties; # discuss the relationship between oral language knowledge and learning capacity in literacy and numeracy.

Assessment:	Two 4,000 word essays due at the end of semester (100%)
