| Subject Overview: | This subject works within the Developmental Learning Framework for school Leaders and the Effective Schools Model. It focuses on those aspects of technical, human, symbolic and cultural leadership that are most important for school literacy and numeracy leaders. The fifth capability of the framework, educational leadership, however, is the main focus. When considering educational leadership, the students will work their way through the challenges present in defining high quality instruction. Evidence from instructional rounds- learning to see, learning to judge – will be examined. The importance of distributed leadership and teachers as leaders of instruction will be a major focus of this course. The systematic measurement of quality pedagogy to assess evidence for high quality instruction will also be covered. Opportunities to develop leadership capabilities in these areas will be embedded into the subject. |
| Learning Outcomes: | On completion of this subject, students will: <ul style="list-style-type: none"> • Understand the key principles in the Developmental Learning Framework for school Leaders • Develop research led practices for leadership in numeracy / literacy • Critically evaluate empirical research within the discipline of school leadership |
