<b>Subject Overview:</b>	This subject brings together the two major threads from the first semester's subjects and presents participants with opportunities to apply the principles in their own clinical workplaces. More difficult teaching situations and the strategies to resolve them will be explored. The emphasis is practical, with participants using the theories and concepts explored in the previous semester during their usual clinical teaching and supervision activities, then reflecting on the effectiveness of their work after receiving feedback from peers and students. A collaborative workshop at the beginning of the semester and another at the completion support this practical experience. An intensive option will appeal to clinicians requiring greater flexibility.											

	<p>Teaching days are generally held at the Parkville campus once per month and are shared with the corequisite subject ('Assessing Clinical Learners'). Apart from the workshops to prepare for and debrief from the peer review exercise (2 hours each), participants will engage in simulated teaching encounters (2 hours), small group sessions with tutors (4 hours), seminars (2 hours) and lecture-style presentations (4 hours).</p>
<b>Learning Outcomes:</b>	<p>By completing this subject, participants should:</p> <ul style="list-style-type: none"> <li># understand how to plan and prepare for clinical teaching to enhance student learning;</li> <li># be aware of their strengths and weaknesses as a clinical teacher and/or supervisor;</li> <li># know how to employ procedures and strategies that enhance effectiveness in various clinical teaching contexts;</li> <li># appreciate the importance of gaining feedback, support and assistance from colleagues;</li> <li># demonstrate skills in presenting, explaining, demonstrating, guiding and supporting the learning of clinical students.</li> </ul>
<b>Assessment:</b>	<p>Mid semester (10%): Reciprocal peer review of observed clinical teaching (1500 words equivalent - low weighting due to peer assessment). End semester (40%): A teaching portfolio including teaching session plans and notes from the peer review sessions (2000 words). End semester (50%): A written assignment in the form of an issues or discussion paper on a topic relevant to the participant's particular clinical education context (1500 words). A pass in this subject requires the satisfactory completion of all assessment components. Please note this subject is assessed on a pass/fail basis only.</p>
