

## GEOM90005 Remote Sensing

<b>Credit Points:</b>	12.50
<b>Level:</b>	9 (Graduate/Postgraduate)
<b>Dates &amp; Locations:</b>	This subject is not offered in 2014.
<b>Time Commitment:</b>	Contact Hours: 48 hours, comprising of 24 hours of lectures and 24 hours of projects and lab exercises Total Time Commitment: 200 hours
<b>Prerequisites:</b>	None
<b>Corequisites:</b>	None
<b>Recommended Background Knowledge:</b>	None
<b>Non Allowed Subjects:</b>	None
<b>Core Participation Requirements:</b>	<p>&lt;p&gt;For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.&lt;/p&gt;         &lt;p&gt;It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: &lt;a href="http://services.unimelb.edu.au/disability"&gt;http://services.unimelb.edu.au/disability&lt;/a&gt;&lt;/p&gt;</p>
<b>Contact:</b>	<b><a href="mailto:dryu@unimelb.edu.au">dryu@unimelb.edu.au</a> (mailto:dryu@unimelb.edu.au)</b>
<b>Subject Overview:</b>	<p><b>AIMS</b></p> <p>To introduce students to the techniques and technology of remote sensing: the extraction of information from satellite and airborne image data. This subject assumes prior knowledge of image processing techniques such as that acquired in subjects such as GEOM30009 Imaging the Environment. Students passing this subject will have the skills to work under supervision in a spatial information or remote sensing agency of consultancy providing services, for example, to natural resource managers.</p> <p><b>INDICATIVE CONTENT</b></p> <p>Use of image processing systems. High level digital image processing, correction and classification; applications of remote sensing in the geosciences, engineering, and resource assessment and inventory; image data in geographic information systems. Detailed application studies in marine mapping, emergency management, environmental assessment and geological mapping.</p>
<b>Learning Outcomes:</b>	<p><b>INTENDED LEARNING OUTCOMES (ILO)</b></p> <p>Having completed this unit the student is expected to:</p> <ol style="list-style-type: none"> <li>1 Describe the acquisition of remotely sensed data;</li> <li>2 Process remotely sensed data to achieve client-driven outcome;</li> <li>3 Describe the use of remotely sensed data in the solution of resource management problems;</li> <li>4 Communicate the analysis and interpretation of remotely sensed data to a client.</li> </ol>
<b>Assessment:</b>	Two practical assignment reports approximately 500 words each, due evenly throughout the semester (10%). Associated with Intended Learning Outcomes (ILOs) 1 and 2 One project proposal report (1000 words) due week 8 (20%). (ILOs 2 and 3) One major project of 3000 words due at the end of semester (70%). (ILOs 2, 3 and 4)

<b>Prescribed Texts:</b>	None
<b>Breadth Options:</b>	This subject is not available as a breadth subject.
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>
<b>Generic Skills:</b>	<p>On successful completion students should have:</p> <ul style="list-style-type: none"> <li># Ability to apply knowledge of science and engineering fundamentals</li> <li># Ability to undertake problem identification, formulation, and solution</li> <li># Ability to communicate effectively, with the engineering team and with the community at large</li> <li># Ability to manage information and documentation</li> </ul>
<b>Notes:</b>	<p><b>LEARNING AND TEACHING METHODS</b> Lectures and Project based use of image processing systems.</p> <p><b>INDICATIVE KEY LEARNING RESOURCES</b> Online interactive tutorials.</p> <p><b>CAREERS / INDUSTRY LINKS</b> This subject uses industry standard processing and analysis packages.</p>
