

## ISYS90078 Health Data, Information and Knowledge

| <b>Credit Points:</b>                              | 12.50  |                |                            |                |  |      |       |
|--|--|----------------|----------------------------|----------------|--|------|-------|
| <b>Level:</b>                                      | 9 (Graduate/Postgraduate)  |                |                            |                |  |      |       |
| <b>Dates &amp; Locations:</b>                      | This subject is not offered in 2014.   |                |                            |                |  |      |       |
| <b>Time Commitment:</b>                            | Contact Hours: 36 hours Total Time Commitment: 200 hours   |                |                            |                |  |      |       |
| <b>Prerequisites:</b>                              | <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>ISYS90069 eHealth &amp; Biomedical Informatics Systems</td> <td>June</td> <td>12.50</td> </tr> </tbody> </table>  | Subject        | Study Period Commencement: | Credit Points: | ISYS90069 eHealth & Biomedical Informatics Systems | June | 12.50 |
| Subject  | Study Period Commencement:   | Credit Points: |                            |                |  |      |       |
| ISYS90069 eHealth & Biomedical Informatics Systems | June   | 12.50          |                            |                |  |      |       |
| <b>Corequisites:</b>                               | None   |                |                            |                |  |      |       |
| <b>Recommended Background Knowledge:</b>           | None   |                |                            |                |  |      |       |
| <b>Non Allowed Subjects:</b>                       | None   |                |                            |                |  |      |       |
| <b>Core Participation Requirements:</b>            | <p>&lt;p&gt;For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.&lt;/p&gt; &lt;p&gt;It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: &lt;a href="http://services.unimelb.edu.au/disability"&gt;http://services.unimelb.edu.au/disability&lt;/a&gt;&lt;/p&gt;</p>  |                |                            |                |  |      |       |
| <b>Contact:</b>                                    | email: <a href="mailto:kgray@unimelb.edu.au">kgray@unimelb.edu.au</a> (mailto:kgray@unimelb.edu.au)  |                |                            |                |  |      |       |
| <b>Subject Overview:</b>                           | <p><b>Aims</b></p> <p>This subject develops familiarity with fundamental aspects of health information science and health information management – how health data is generated, collected, stored, communicated, integrated, analysed and converted into knowledge for clinical, research and administrative purposes.</p> <p><b>Indicative Content</b></p> <p>Lectures and tutorials will cover five topics:</p> <ol style="list-style-type: none"> <li>1. Data Sources in Health <ul style="list-style-type: none"> <li># Special features of biomedical and clinical data</li> <li># Types of data (clinical, molecular, images, environmental)</li> <li># Generation of biomedical and clinical data (clinical devices, laboratory equipment, populational surveys, sensors)</li> <li># Data repositories (Bioinformatics databases, literature, evidence-based practice, clinical databases)</li> </ul> </li> <li>2. Information Modelling in Health <ul style="list-style-type: none"> <li># Modelling health information and clinical information systems</li> <li># Accessing and retrieving information</li> <li># Standards in healthcare (nomenclatures, terminologies, taxonomies, vocabularies and ontologies) MeSH terms, SNOMED-CT, LOINC, ICD9, ICD10, UMLS</li> <li># Standards organizations in Australia and worldwide</li> </ul> </li> <li>3. Information Processing in Health <ul style="list-style-type: none"> <li># Information processing in biomedicine, healthcare and population health.</li> </ul> </li> </ol> |                |                            |                |  |      |       |

|                           |   |
|---------------------------|---|
|                           | <ul style="list-style-type: none"> <li># Main software tools and methods, with a focus on clinical research, computerised physician order entry (CPOE) in hospitals, disease surveillance</li> </ul> <p>4. Information Analysis and Visualization in Health</p> <ul style="list-style-type: none"> <li># Visualising information</li> <li># Knowledge management and discovery</li> </ul> <p>5. Change Management in Health IT</p> <ul style="list-style-type: none"> <li># Management change and adoption</li> <li># Regulatory framework, ethical, security and privacy issues</li> </ul>   |
| <b>Learning Outcomes:</b> | <p><b>Intended Learning Outcomes (ILO)</b></p> <p>On completion of this subject the student is expected to:</p> <ol style="list-style-type: none"> <li>1 Communicate technical understanding of specific characteristics and processes involved in managing health data, information and knowledge</li> <li>2 Demonstrate an integrated understanding of how health data is generated, collected, stored, communicated, integrated, analysed and converted into knowledge for clinical, research and administrative purposes</li> </ol>   |
| <b>Assessment:</b>        | <p>Five written reports based on individual computer-based learning tutorials / practical activities done in class, around 500 words each (2500 words total), submitted in weeks 3,5,7,9 and 11 (50%). Addresses Intended Learning Outcome (ILO) 1 Two-hour examination at the end of semester (50%). Addresses ILOs 1 and 2 Hurdle requirement: To pass the subject, students must obtain at least 25/50 in each of these 2 components.</p>  |
| <b>Prescribed Texts:</b>  | None  |
| <b>Breadth Options:</b>   | This subject is not available as a breadth subject.   |
| <b>Fees Information:</b>  | Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>   |
| <b>Generic Skills:</b>    | <p>On completion of this subject, students should have developed the following generic skills:</p> <ul style="list-style-type: none"> <li># Understanding of global issues relating to health</li> <li># The ability to work across different disciplines</li> <li># Excellent in-depth knowledge to support responsible leadership</li> </ul>  |
| <b>Notes:</b>             | <p><b>Learning and Teaching Methods</b></p> <p>This subject is offered as one 3-hour block of two 1- hour lectures plus one 1- hour tutorial per week over 12 weeks.</p> <p>Subject documents and class records are handled using LMS Blackboard.</p> <p><b>Indicative Key Learning Resources</b></p> <p>This subject has no textbook. Students have access to lecture audio and slides in the LMS, as well as electronic full-text of recommended readings, including current journal articles, government documents and industry reports. 2012 examples of recommended readings are:</p> <p>Cohen, A., Adams, C., Davis, J., Yu, C., Yu, P., Meng, W., Duggan, L., McDonagh, M., &amp; Smalheiser, N. (2010). Evidence-based medicine, the essential role of systematic reviews, and the need for automated text mining tools. Pp. 376-380. In Proceedings of IHI'10, November 11-12 2010, Arlington Virginia USA.</p> <p>Collen, M. (2012). Computer Medical Databases: The First Six Decades (1950-2010). Springer, London.</p> <p>Ferlie, E., Crilly, T., Jashapara, A., &amp; Peckham, A. (2012). Knowledge mobilization in healthcare: A critical review of health sector and generic management literature. <i>Social Science &amp; Medicine</i> 74, 1297-1304.</p> <p>Musen, M., Noy, N., Shah, N., Whetzel, P., Chute, C., Story, M.-A., Smith, B. &amp; the NCBO team. Participatory personal data: An emerging research challenge for the information sciences. <i>Journal of the American Society for Information Science and Technology</i>, [in press 34pp.]</p> <p><b>Careers/Industry Links</b></p> <p>This subject is important in the field of eHealth and biomedical informatics, i.e. work that concerns the acquisition, storage, retrieval and use of information in, about and for human health, and the design and management of related solutions to advance the understanding and practice of healthcare. This subject is offered jointly by the Faculty of Engineering and the Faculty of Medicine, Dentistry and Health Sciences, and also uses expert guest speakers from industry and government. In particular, this subject addresses the core components of major national and international certification programs such as the Health Information Management and Systems Society (HIMSS) and the Certified Health Information Australasia (CHIA).</p> |
