Subject Overview:	International firms face complex problems of governance and increasing scrutiny. Conflicts between shareholders, workforces, consumers and local communities are heightened by interactions with sovereign governments and non-governmental organisations (NGOs) having their own legal jurisdictions and international agreements. Reputation Risk has become an important factor in creating a winning strategy within an interdependent global economy that continuously creates legal, social and economic threats and opportunities. Within a corporate strategy framework, this subject begins with the basic concepts of agent theory, the stakeholder theory and corporate governance in an era of 'social responsibility', examines cases of governance failure, traces how corporations have improved transparency and accountability in response to evolving best practice, and assesses the impact of legislation and media on governance. Aligning ethics (anti-corruption and anti-cronyism policies) and environment with economic competitiveness in the decision-making process of an international organisation aims at enhancing its long term value. Despite legal contextual differences, cross-cultural particularities, different stock exchange regulations and characteristics, 'best' corporate governance principles of transparency, accountability, responsibility, fairness and shareholders' rights are now globally acknowledged as risk reducing and reputation enhancing features.
Learning Outcomes:	On successful completion of this subject, students should be able to: <ul style="list-style-type: none"> # Understand how the interaction of governments and NGOs impacts on relations between international firms and their stakeholders; # Understand the importance of reputation risk for international firms and how it can be managed; # Understand how international firms have identified and responded to governance failure;

	<ul style="list-style-type: none"> # Understand how the aligning of ethics, environmental responsibility with strategic decision making in an international firm can enhance long term value; # Analyse and synthesise different theories, models and ideas relevant to issues of governance in an international context; # Appropriately apply these theories, models and ideas to different scenarios as presented in case studies and class materials; # Critically evaluate usefulness of the different theories, models and ideas in addressing problems of international governance.
Assessment:	3000 word group assignment to be submitted and presented on the last day/ session of the course (50%) – (due 21 Feb 2014 or 28 September 2014 and). 3500 word individual assignment due 2.5 weeks after the last session (50%)
Prescribed Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
