Subject Overview:	This subject will provide an overview of the ways that music can be used to promote physical health and healthy behaviours for a range of people. Topics covered will include music for expression, relaxation, anxiety reduction and communication. Students will be involved in experiential activities underpinned by theoretical knowledge. They will also contribute to weekly web-based discussion that furthers understanding of topics covered in class.
Learning Outcomes:	On completion of the subject students should be able to: <ul style="list-style-type: none"> # Reflect on the relationship between music and health # Identify areas for musical development outside the technique / competency spectrum # Develop skills in using music to reduce anxiety and improve communication
Assessment:	Two 1500 word essays due approximately mid-semester and end of semester (40% & 50% respectively); contribution to weekly web-based discussion (10%).
Prescribed Texts:	Levitin, D.J. The world in six songs: How the musical brain created human nature. London: Dutton Publishers, 2008.
