

NURS50007 Clients with Acute and Chronic Illness

Credit Points:	25												
Level:	5 (Graduate/Postgraduate)												
Dates & Locations:	This subject is not offered in 2014.												
Time Commitment:	Contact Hours: TOTAL 174 hours - 36 hours lectures, 18 hours clinical laboratory sessions, 120 hours clinical practicum. Students are also expected to devote approximately 12 hours self directed a week to this subject. Total Time Commitment: 318 hours												
Prerequisites:	<p>Completion of a Level 2 First Aid Certificate prior to clinical placement.</p> <p>And a pass in the following prior to enrolment:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>NURS50003 Nursing Science 1</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>NURS50004 Nursing Assessment & Care</td> <td>Semester 1</td> <td>25</td> </tr> <tr> <td>NURS90066 Foundations of Nursing</td> <td>Semester 1</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	NURS50003 Nursing Science 1	Semester 1	12.50	NURS50004 Nursing Assessment & Care	Semester 1	25	NURS90066 Foundations of Nursing	Semester 1	12.50
Subject	Study Period Commencement:	Credit Points:											
NURS50003 Nursing Science 1	Semester 1	12.50											
NURS50004 Nursing Assessment & Care	Semester 1	25											
NURS90066 Foundations of Nursing	Semester 1	12.50											
Corequisites:	<table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>NURS50006 Nursing Science 2</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	NURS50006 Nursing Science 2	Semester 2	12.50						
Subject	Study Period Commencement:	Credit Points:											
NURS50006 Nursing Science 2	Semester 2	12.50											
Recommended Background Knowledge:	None												
Non Allowed Subjects:	None												
Core Participation Requirements:	This subject requires students to actively and safely contribute to clinical activities. Students who think their disability will impact on meeting this requirement are encouraged to discuss this matter with the Nursing Course Coordinator and the Disability Liaison Unit.												
Contact:	<p>Nursing Melbourne School of Health Sciences The University of Melbourne Alan Gilbert Building</p> <p>Level 7, 161 Barry St Carlton Victoria 3010 AUSTRALIA T: +61 3 8344 4171 F: +61 3 8344 4188 E: nursing-enquiries@unimelb.edu.au (mailto:nursing-enquiries@unimelb.edu.au) W: www.nursing.unimelb.edu.au (http://www.nursing.unimelb.edu.au/)</p>												
Subject Overview:	<p>This subject introduces students to the concepts of acute and chronic illness in individuals across the life-span. The subject focuses on the <i>National Health Priorities</i>, giving students the opportunity to examine the principles and practices underpinning the sociocultural context of patient care. Knowledge is developed in relation to high risk groups, including patients experiencing cardiovascular disorders, asthma and diabetes. Content includes strategies for injury prevention and control, risk reduction and early detection of key health issues, peri-operative care, admission and discharge planning, self-care management, community health and support services and models of collaborative care. Students will continue to refine and expand their knowledge and competency in patient assessment, problem identification, clinical decision making, nursing intervention selection, medication administration and practice evaluation in the context of acute and chronic illness. Knowledge and skills related to fundamental nursing practices will be consolidated and extended. Concepts are patient focused,</p>												

	<p>evidence based and designed to give students the skills to deliver safe, effective high quality care to individuals with acute and chronic health issues.</p> <p>In the simulated learning laboratory students will develop skills relating to specific medical/surgical nursing interventions.</p> <p>During the professional experience placement, under the guidance of clinical educators and clinical preceptors, students will gain experience in settings that enable them to meet the learning outcomes specific to this subject. The major focus for the professional experience placement component of this subject is the integration of the principles of medical/surgical nursing, clinical decision making, and more complex nursing interventions. On completion of the subject it is expected that students, while providing therapeutic interventions, are able to incorporate the further collection of health assessment data and adjust care accordingly for 2 to 3 patients.</p>
Learning Outcomes:	<p>At the completion of this subject students should be able to:</p> <ul style="list-style-type: none"> # identify and be cognisant of the National Health Priorities and integrate clinical practices guidelines where relevant; # identify ethical and legal principles of autonomy, confidentiality and informed consent as they apply to nurse-patient interactions; # utilise strategies that facilitate a therapeutic nurse patient relationship, refine patient assessment by using a comprehensive nursing framework and utilise assessment data to develop nursing care plans for patients experiencing acute or chronic illness including Aboriginal and Torres Strait Islander and other vulnerable populations; # demonstrate analytical skills by incorporating the theoretical principles of clinical decision making into patient care plans; # implement appropriate nursing assessment and care for patients requiring pre, peri and post operative management; # demonstrate competence in selected nursing skills including administration of selected subcutaneous, intramuscular, intravenous and enteral medications; # communicate verbally, and in writing, in a professional manner with the patient, their families and other members of the health care team; # understand resource use and sustainability issues that require management within the healthcare system.
Assessment:	<p>Theoretical Component 60% 1. 2,000 word Assignment - Week 6 (20%)2. 3 hour exam - Exam period (40%, must pass component). Professional Experience Component 40% 1. Professional Experience Placement Appraisal (PEP) (Pass/Fail) 2. Professional Experience Preparatory Practice Performance Assessment (PEPPA) (10 minute psychomotor examination conducted in simulated learning laboratory) (20%) 3. Professional Experience Practice Analysis - 2000 words - Week 12 (20%) Hurdle Component 1. Attendance at all Simulated Learning Laboratory sessions during the semester 2. PEPPA (Must pass component for attendance at PEP) 3. Attendance at all Professional Experience Placement (PEP) days is compulsory Students must pass the theoretical, professional experience & hurdle components to achieve a pass in the subject</p>
