<b>Subject Overview:</b>	Contemporary societies are characterized by social differences and inequalities. Many differences are linked to social categories such as social class, gender, ethnicity, age, religion and disability. They indicate not only different life style decisions but fundamental inequalities of life chances and are responsible for systematic inequalities in income, health and life expectancy. Many of these inequalities are seen as unjust even though they continue and sometimes even increase. This subject will give a comprehensive overview about central social inequalities on a national and international level. It will discuss major sociological approaches to understand the existence and reproduction of these inequalities and how the understanding and theorizing of social inequalities has changed in recent decades.
<b>Learning Outcomes:</b>	On completion of this subject students should: <ul style="list-style-type: none"> <li># have a good understanding of contemporary social inequalities such as class, gender, ethnicity;</li> <li># have a good knowledge of major social sciences approaches to understand the sources of social inequalities and how they are reproduced;</li> <li># have a good understanding of the different dimensions involved in social inequalities;</li> <li># have the ability for critical and reflexive judgements about reasonable strategies to deal with social inequalities and to improve social conditions.</li> </ul>
<b>Assessment:</b>	A research essay of 2,000 words (50%) due mid-semester and a research essay of 2,000 words (50%) due during the examination period.
