Overview:	<p>Development Studies is a dynamic field concerned with processes of social, economic, political and cultural change in the global South. This minor provides students the opportunity to critically examine processes of managed change in the developing world, as well as a skills set to intervene in such processes. Through this programme, students will better understand the nature of policies and relationships at local, national and international levels that have shaped poverty, inequality and insecurity in the contemporary world. We examine themes such as debt and global poverty, environmental sustainability, the relationship between citizens and the state, culture and human rights, globalisation, national sovereignty, gender inequity, social exclusion, health, and migration.</p>
