<b>Overview:</b>	<p>Landscape Architecture is a design profession which provides a unique bridge between design and the environmental sciences. This major explores the practice, theory, history, and long-standing ecological sensibilities of the discipline. Landscape Architecture ranges across all scales of design encompassing large-scale public projects such as the Olympic Parks in Sydney and Beijing, to suburban development, to smaller urban spaces and gardens.</p> <p>Landscape Architecture offers creative opportunities to engage in core ecological, cultural and social issues faced today. Students of Landscape Architecture are attracted to its creativity and diversity, its challenges and demands.</p> <p>Careers and Further Study</p> <p>A major in Landscape Architecture prepares students either for employment or the two-year Master of Landscape Architecture program to become an accredited landscape architect. For more information about the Master of Landscape Architecture, please visit the Melbourne School of Design web site: <a href="http://msd.unimelb.edu.au/">http://msd.unimelb.edu.au/</a> (<a href="http://msd.unimelb.edu.au/">http://msd.unimelb.edu.au/</a>)</p>
<b>Learning Outcomes:</b>	By the end of the three year Bachelor of Environments degree with a Landscape Architecture major, students will have developed a strong base of design knowledge and competence across the landscape architecture discipline.
