Overview:	<p>The Graduate Certificate allows students who have completed an undergraduate degree to re-focus or expand their body of knowledge by completing the requirement of one of the undergraduate majors (or equivalent) in the Bachelor of Science not already completed. Students will be required to have completed level 2 prerequisites.</p> <p>The Graduate Certificate provides a pathway to the Master of Science Streams.</p>									
Learning Outcomes:	<p>Students who complete the graduate certificate should:</p> <ul style="list-style-type: none"> # Demonstrate an independent approach to knowledge that uses rigorous methods of inquiry and appropriate theories and methodologies that are applied with intellectual honesty and a respect for ethical values; # Apply critical and analytical skills and methods to the identification and resolution of problems; # Act as informed and critically discriminating participants within the community of scholars, as citizens and in the work force; # Communicate effectively; # Commit to continuous learning; # Be proficient in the use of appropriate modern technologies, such as the computer and other information technology systems, for the acquisition, processing and interpretation of data. <p>-</p> <p>Core participation requirements: Fieldwork</p> <p>The sites essential to this fieldwork are not wheelchair accessible and require students to traverse broken ground. Visual observation and interpretation of the sites is also an essential component, as is specimen and microscope work.</p>									
Structure & Available Subjects:	<p>Completion of 62.5 points of study</p> <ul style="list-style-type: none"> # 50 points of study at level 3 # 12.5 points of study at level 9
