

Defence and Disease

Year and Campus:	2015																								
Coordinator:	Dr Karena Waller																								
Contact:	klwaller@unimelb.edu.au (mailto:klwaller@unimelb.edu.au)																								
Overview:	<p>This major is only available to students who commenced prior to 2014. It will no longer be offered after 2015.</p> <p>The human immune system has evolved to control harmful microbes and tumors but can sometimes inflict damage on its host, and as such is a major contributor to human disease. This major examines and integrates immunology, the study of the immune system, with pathological processes and their morphologic, molecular and genetic bases which are associated with immune based disease. The major opens up careers in diagnostics, molecular biology, biotechnology and regulation, research into infectious agents associated with immune based pathology and the various outcomes of the immune system, especially those involved with autoimmunity and immunopathology. It provides a basis for further study in medical and paramedical disciplines.</p>																								
Learning Outcomes:	<p>Upon completion of this major students should be able to:</p> <ul style="list-style-type: none"> # understand the development, function and components of the immune system, especially the molecular aspects of immunity to infection, and the basis of immunopathologic conditions including allergies, autoimmune disease and transplantation responses; # apply this knowledge to the determination of strategies which can augment or inhibit the immune response; # describe the principles and procedures involved in isolating and characterising immune cells and their products; # understand the cellular, molecular and genetic bases of the immunopathological conditions described above and how these contribute to morbidity, mortality and the development and clinical use of therapeutic strategies; and # communicate scientific ideas and findings effectively in both oral and written form. 																								
Structure & Available Subjects:	<p>Completion of 50 points of study at Level 3.</p> <p>In order to complete this major, students have to complete the pre-requisite Level 2 subject MIIM20002 Microbes, Infections and Responses.</p>																								
Subject Options:	<p>Second Year:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>MIIM20002 Microbes, Infections and Responses</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table> <p>Third Year:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>PATH30001 Mechanisms of Human Disease</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>MIIM30002 Principles of Immunology</td> <td>Semester 1</td> <td>12.50</td> </tr> </tbody> </table> <p>Plus one subject from:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>PATH30002 Techniques for Investigation of Disease</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>MIIM30015 Techniques in Immunology</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	MIIM20002 Microbes, Infections and Responses	Semester 2	12.50	Subject	Study Period Commencement:	Credit Points:	PATH30001 Mechanisms of Human Disease	Semester 1	12.50	MIIM30002 Principles of Immunology	Semester 1	12.50	Subject	Study Period Commencement:	Credit Points:	PATH30002 Techniques for Investigation of Disease	Semester 1	12.50	MIIM30015 Techniques in Immunology	Semester 2	12.50
Subject	Study Period Commencement:	Credit Points:																							
MIIM20002 Microbes, Infections and Responses	Semester 2	12.50																							
Subject	Study Period Commencement:	Credit Points:																							
PATH30001 Mechanisms of Human Disease	Semester 1	12.50																							
MIIM30002 Principles of Immunology	Semester 1	12.50																							
Subject	Study Period Commencement:	Credit Points:																							
PATH30002 Techniques for Investigation of Disease	Semester 1	12.50																							
MIIM30015 Techniques in Immunology	Semester 2	12.50																							

	Plus one subject from:		
	Subject	Study Period Commencement:	Credit Points:
	PATH30003 Frontiers in Human Disease	Semester 2	12.50
	MIIM30014 Medical Microbiology: Virology	Semester 2	12.50
	PATH30004 Advanced Investigation of Human Disease	Semester 2	12.50
	MIIM30003 Medical and Applied Immunology	Semester 2	12.50
