Subject Overview:	This subject was formerly called Strategic Planning in Asia-Pacific Cities. Many Asia-Pacific cities have undergone rapid urban development and change as they have become integrated into the global economy. The character of that integration has changed over time; at the same time social and political aspirations have been expressed in new demands for services and housing. This course will explore the urban planning implications of these changes in a city. It begins with a review of the global and local forces that have generated change in Asia-Pacific cities. This section will isolate key features for further investigation. These selected features will then be explored in seven days in the selected Pacific Asian city through a series of lectures, field inspections and field work. A third part of the course, involving seminar discussion, will be followed by report writing on planning issues in the selected city.
Learning Outcomes:	At the completion of this course the student will be able to: # Describe and account for global influences on a selected Asia-Pacific city # Plan and carry out data collection within an international city # Relate the concepts of urban change to the experience of an international city # Analyse urban policy efforts in an international city
Assessment:	Field work proposal due before departure to field city (20%) – due mid June, 1000 words; Field notes due at end of field study (30%) – due early July, 1500 words; Major report due before the beginning of semester 2 (50%) – due during the fourth week of July, 2500 words.

Prescribed Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	# Field work design and operation # Policy analysis # Interpretation of urban outcomes in a new context
Related Course(s):	Master of Design (Urban Design) Master of Urban Planning
Related Majors/Minors/ Specialisations:	Melbourne School of Design multidisciplinary elective subjects
