Subject Overview:	The subject explores the history and archaeology of Greece, the Near East, and the wider Mediterranean from the Bronze Age to the end of the Archaic period to 479BC. The main emphasis will be on the rise and fall of the Bronze Age civilisations such as the Minoans and Mycenaeans, the transition from the Late Bronze Age to the Early Iron Age, early Greek colonisation of the Mediterranean and interactions with non-Greeks, the birth of a Hellenic identity, economic and social affairs, 'Orientalisation' of Archaic Greece via contacts with the Near East, the Greco-Persian conflict, Greek political developments (tyanny, oligarchy and democracy), Greek historiography (Herodotus), as well as material culture of the Greeks in various areas of the Mediterranean seen from archaeological evidence. Furthermore, the emergence of the polis system will be explored; and the role of religious practices and temples. There will be detailed examination of modern scholarship on ethnicity, colonisation, migration and acculturation. These concepts are especially important for the study of the Archaic period, which differs greatly from the succeeding Classical period that has given us the splendid monuments of the Athenian Acropolis.
