	<p>Topics covered include - Fluid statics, manometry, derivation of the continuity equation, mechanical energy balance, friction losses in a straight pipe, Newton's law of viscosity, Fanning friction factor, treatment of roughness, valves and fittings; simple network problems; principles of open channel flow; compressible flow, propagation of pressure wave, isothermal and adiabatic flow equations in a pipe, choked flow. Pumps – pump characteristics, centrifugal pumps, derivation of theoretical head, head losses leading to the actual pump head curve, calculating system head, determining the operating point of a pumping system, throttling for flow control, cavitation and NPSH, affinity laws and pump scale-up, introduction to positive displacement pumps; stirred tanks- radial, axial and tangential flow, type of agitators, vortex elimination, the standard tank configuration, power number and power curve, dynamic and geometric similarity in scale-up; Newtonian and non-Newtonian fluids, Multi-dimensional fluid flow-momentum flux, development of multi-dimensional equations of continuity and for momentum transfer, Navier-Stokes equations, application to tube flow, Couette flow, Stokes flow.</p>
<b>Learning Outcomes:</b>	<p><b>INTENDED LEARNING OUTCOMES (ILO)</b></p> <p>On completion of this subject the student is expected to:</p> <ol style="list-style-type: none"> <li>1 Apply the principles of force balance in stationary fluids to solve engineering problems</li> <li>2 Solve mechanical energy balances in one dimensional pipe flow, scale-up pumps, mixers</li> <li>3 Apply multi-dimensional flow equations to axisymmetric and planar flows.</li> </ol>
<b>Assessment:</b>	<p>Two practical or written assignments of no more than 5 pages each (not including diagrams, graphs and raw data). 20% total (10% per assignment). Overall time commitment of 20-25 hours (10-12 hours per assignment). Intended Learning Outcomes (ILO's) 1 and 2 assessed in the assignments. The first assignment is due on or around week 4 and the second is due on around week 8 3 hour end of semester examination (80%). ILOs 1 to 3 assessed in the exam.
