

GC-MPED Specialist Certificate in the Management of Posterior Eye Disease

Year and Campus:	2015								
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees								
Level:	Graduate/Postgraduate								
Duration & Credit Points:	25 credit points taken over 12 months								
Coordinator:	Julie Martin Tel. 9035 9822 Email martinja@unimelb.edu.au								
Contact:	Program Coordinator - Julie Mattingley Phone - (03) 9810 3248 Email: Optometry@commercial.unimelb.edu.au (mailto:Optometry@commercial.unimelb.edu.au)								
Course Overview:	<p>The Specialist Certificate in the Management of Paediatric Patients offered by the Department of Optometry & Vision Sciences in the Faculty of Science is designed to allow optometrists to advance their capabilities in the day-to-day management of eye disease by affording them the opportunity to review the most current ideas on the pathophysiology, diagnosis and management of ocular disease affecting the back of the eye, thus also preparing them for any further shifts in the scope of optometric practice in this area. This review will include a critical examination of how the state-of-the-art diagnostic and imaging tools can be incorporated into clinical practice. Given the explosion in the literature of health sciences, the course will concentrate on developing a deep understanding in a select group of eye diseases regularly seen in optometric practice (for example, glaucoma, diabetes, age-related macular degeneration). The course will, however, provide optometrists with the tools necessary to develop a deeper, evidence-based understanding in other eye diseases of their choosing.</p> <p>The Specialist Certificate is achieved through successful completion of one compulsory 25 point subject, Management of Posterior Eye Disease.</p>								
Learning Outcomes:	<p>On completion of this course the students should have:</p> <ul style="list-style-type: none"> # advanced knowledge and skills in their selected fields of clinical optometry; # a detailed knowledge in the use and application of specific advanced diagnostic techniques and/or instrumentation; # an advanced ability to evaluate and synthesize research from the scientific and clinical literature; # an appreciation of the value of, and the ability to achieve, collaboration with other healthcare professionals as an effective means to aid clinical problem-solving; # the capacity to interpret and integrate information from a variety of sources (such as patient presentation details, advanced diagnostic techniques, scientific, clinical and technical literature, and other healthcare professionals), in the development of the most appropriate patient management; # the ability and initiative to offer enhanced clinical services based on their in-depth study in selected fields of clinical optometry; # have advanced their clinical skills and developed a flexibility of outlook such that they are better able to respond to future paradigm shifts in the scope of optometric management. 								
Course Structure & Available Subjects:	Subject Level - 9 Subject Title - Management of Posterior Eye Disease (formerly OPTO90016 Advanced Posterior Eye Disease Management) Points - 25 Compulsory
