Subject Overview:	What role have objects, artefacts and places played in the shaping of culture? Are we 'prisoners' of objects'? This subject engages critical approaches to objects as emissaries of culture. Field trips and class-based explorations of the everyday world of objects, many of which we take for granted, stress the importance of things as sources of evidence unavailable in written texts or documents. Through addressing the importance and meaning of everyday things, insights will be gained into technology, consumer society, gender, popular culture, ethnic identity, and the built environment. Through discussions of making, losing, exchanging, inventing, collecting, desiring, inheriting, eating and recycling things, students will learn to interpret objects in their historical context.						
Learning Outcomes:	Students who complete this subject will # understand significant issues in the theory and practice of material culture analysis # be able to evaluate and synthesise the research and professional literature in the discipline # show the application of historical artefact analysis in a practical research area						
Assessment:	An artefact statement of significance (1000 words) 25% (due mid-semester), and a research essay of 4000 words 75% (due at the end of semester).
