<b>Subject Overview:</b>	Have you ever wondered how language actually works? Or how it can be that a 6 year-old child can know more about their native language than the most sophisticated computers? This subject is a practical introduction to the nature of human language which gives a conceptual framework for discussing language and provides the tools required to analyse and describe all of the world's 6000+ languages. Central areas of linguistics will be covered using data from languages from all over the world, including speech sounds, word structure, sentence structure, meaning, language learning, and language change.
<b>Learning Outcomes:</b>	Students who complete this subject will: <ul style="list-style-type: none"> <li># Explore the general nature of human language</li> <li># Learn how language can be described and analysed</li> <li># Gain a conceptual framework for thinking about and discussing language.</li> <li># Develop simple analytic skills as applied to language</li> <li># Attain a broad overview of academic approaches to the analysis of language</li> <li># Develop foundational discipline-specific research skills in analysing and describing languages from around the world</li> <li># Become acquainted with the use of learning and research technologies (LMS, library) to solve linguistic tasks</li> <li># Engage in pedagogically led interactions in the classroom around problems and tasks in Linguistics</li> <li># Develop an understanding of linguistic, social and cultural diversity in the university and wider community</li> </ul>

<b>Assessment:</b>	3 problem-solving assignments (equivalent to 2000 words total) distributed throughout the semester [50%] 2-hour exam (equivalent to 2000 words) during the examination period [50%] This subject has the following hurdle requirements: Regular participation in tutorials is required with a minimum of 75% attendance.
