Subject Overview:	This subject provides students with clinical experience of music therapy. Placements will be in hospital or community settings under the guidance of a registered music therapist. The placement will include a graded introduction to the assessment of client needs, the development						

	of program plans and the provision of music therapy interventions. Students will participate in the provision of music therapy interventions, taking responsibility for sessions where appropriate, and evaluating and measuring benefit of the intervention. Tutorials will develop therapeutic skills for practice and foster the development of an individual therapeutic style based that can be adapted for various client groups.
Learning Outcomes:	On completion of this subject, students should be able to: <ul style="list-style-type: none"> # Adapt learned music therapy skills to various client populations; # Identify and apply appropriate ethical standards of practice; # Access research literature using IT resources and print journals; # Work as an informed team-member within the multidisciplinary team in special education and clinical settings; and # Construct a clinical report using accepted research guidelines.
Assessment:	On Campus Students: A written assignment of 3,000 words, comprising either a case study or a group project (60%) due at the end of semester; clinical training assessment (30%) completed by supervisor at the end of semester; class presentation (10%) given during the semester. Blended Learning Students: A written assignment of 3,000 words, comprising either an individual or group case study (60%) due at the end of semester and submitted on-line; clinical training assessment (30%) completed by supervisor at the end of semester; 20 minute class presentation (10%) given during the second intensive teaching block in mid semester.
Prescribed Texts:	Wheeler, B. L., Shultis, C. L. & Polen, D. W. (2005). Clinical Training Guide for the Student Music Therapist. Gilsum, NH: Barcelona Publishers.
