

OPTO90015 Management of Neural Disorders of Vision

Credit Points:	25
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2015, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus.
Time Commitment:	Contact Hours: Approx. 20 hours of online learning per week. Total Time Commitment: 340 hours.
Prerequisites:	Expected level of knowledge is that of a 4-year Optometry qualification. To enrol in this subject, you must be admitted in the Master of Clinical Optometry or Specialist Certificate in the Management of Neural Disorders of Vision. This subject is not available for students admitted in any other courses.
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	For the purposes of considering requests for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements for this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Contact:	School of Melbourne Custom Programs Award Programs Team Program Coordinator - Julie Mattingley Phone - (03) 9810 3248 optometry@commercial.unimelb.edu.au (mailto:optometry@commercial.unimelb.edu.au)
Subject Overview:	This subject is to enable optometrists to extend their abilities to evaluate the sensory and motor pathways of the visual system, both in the context of evaluating visual complaints themselves as well as gaining further knowledge of how visual and ocular motor signs may reflect a range of systemic conditions, particularly of the central nervous system. Because complaints related to these pathways may reflect problems arising anywhere from the anterior visual pathways to the higher-order visual cortices, optometrists should benefit from gaining a deeper understanding of the current state of knowledge of these pathways and their assessment.
Learning Outcomes:	On completion of the subject enrolled optometrists will: <ul style="list-style-type: none"> # have enhanced skills for assessment of sensory and motor aspects of the visual system; # have expanded diagnostic ability with regard to identifying potential conditions requiring referral to appropriate specialists; # have a broader ability to incorporate latest findings from neuro-ophthalmic literature into assessment and management of patients seen in optometric practice; # further develop their ability to communicate with relevant medical specialists in the co-management of patients with appropriate conditions.
Assessment:	Critical Appraisal of Literature, 2000 words (15%) 2 x Case Study Report and Peer Review, 2500 words each (60%) Portfolio (20%) Online Contribution (5%)

Prescribed Texts:	Enrolled optometrists will be directed to primary research articles and review articles. Case studies will also be provided, both in print and online format.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>On completion of this subject the student should:</p> <ul style="list-style-type: none"> # have improved capacity to evaluate and synthesise a range of professional and scientific literature associated with the knowledge and skills in the area being studied; # be able to articulate knowledge and understanding in a written presentation; # have developed an understanding of the value of advanced knowledge and improved technology to both a professional and wider community; # have an appreciation of the design, conduct, analysis and reporting of research; # have developed a high level of analytic and problem solving skill; # have developed a flexibility of approach to enable better response to a background of rapidly changing information; # have confidence to broaden scope of knowledge by consulting professional and scientific literature from fields that overlap and enhance professional practice; # have the confidence to call upon peers to discuss and confer when needed; # have developed capacity to manage competing demands on time and enhanced capacity for self-directed work; # have and understanding of the area being studied in an international context.
Related Course(s):	Master of Clinical Optometry Specialist Certificate in the Management of Neural Disorders of Vision
