Subject Overview:	This subject provides students with specific foundational knowledge for understanding the 'Gap' in Indigenous health. Following a chronological approach, this subject provides students with an understanding of Aboriginal and Torres Strait Islander health from pre-invasion to the present. Along this continuum, Aboriginal and Torres Strait Islander health issues are examined in terms of their socio-economic origins, the clash of Aboriginal and Torres Strait Islander and settler values, aspirations and outcomes, and comparative demographical trends. Key topics include: colonisation and infectious disease; loss of land/economy & health impacts; conflict and health; impacts of segregation; cultural oppression, identity and health; inter-generational health effects of family separations; and, institutional racism and health. Students will also consider the development of Aboriginal and Torres Strait Islander-led strategies, including Aboriginal and Torres Strait Islander leadership and community control of health services. The subject draws on a range of rich archival material, recent research, audiovisual materials as well as contemporary Indigenous community perspectives on Aboriginal and Torres Strait Islander health and wellbeing.
Learning Outcomes:	On completion of this subject students should be able to: # Explain particular Aboriginal and Torres Strait Islander health issues in terms of their historical antecedents;

	<ul style="list-style-type: none"> # Explain contemporary Aboriginal and Torres Strait Islander health issues in terms of key socio-economic and demographic variables and their historical basis. # Analyse the potential of public health interventions in relation to Aboriginal and Torres Strait Islander history and experiences of health/illness. # Critically analyse professional and popular representations of Aboriginal and Torres Strait Islander health disadvantage, own standpoint as an informed ethical public health practitioner and implications for own professional practice. # Assess current responses to Aboriginal and Torres Strait Islander health issues drawing on key social and cultural factors and their historical origins.
Assessment:	Reflective Journal (2,500 words) due at the end of semester (50%) {hurdle requirement} Research Paper (2,500 words) due mid semester (50%) {hurdle requirement} Intensive Attendance (minimum of 80% attendance is required) {hurdle requirement} (pass/fail)
Prescribed Texts:	A book of readings will be made available to the students.
Breadth Options:	This subject is not available as a breadth subject.
