Subject Overview:	This subject is a compulsory subject within the Master of Public Health. Successful public health practitioners require solid working knowledge of both leadership in public health and management in public health. "Public Health Leadership and Management" will expose students to relevant theories and models of public health leadership and management. These learnings will be grounded in real-life case studies of public health significance, interviews with experts in the field, and small group exploration and reporting on important public health issues.
Learning Outcomes:	On the completion of this subject students should be able to: <ul style="list-style-type: none"> # Discuss and reflect on how effective leadership and management occurs across public health organisations with particular reference to communication, decision making, human rights, equity and ethical approaches; # Apply the fundamental management functions of planning, budgeting, staffing, regulatory oversight, monitoring, reporting, coordinating and effective team building in public health and health care organisations; # Articulate the ways in which age, gender, ethnicity and Indigenous status, society, culture, geography, the environment and socio-economic status influence public health leadership; # Apply knowledge of Indigenous, culture and values, and global cultural diversity to public health leadership in collaborative, complex and intercultural settings; # Reflect on the theories of leadership and management in relation to individual characteristics and style, and personal attitudes and beliefs, and consider how these impact on decision-making in complex research and public health practice

	# Accomplish creative and authentic solutions, to real-world challenges for public health leadership and management, by means of managed teamwork.
Assessment:	Group work - approximately five students per group Oral presentation on a public health issue – 30 minutes per group on the last teaching day Due on the last teaching day (20%) Written terms of reference, for the way the group is to operate as a team. Due on the third teaching day (5%) Peer assessment of group members. Due two weeks after the last teaching day (5%) Essay on a contemporary national or international public health issue – 3000 words. Due six weeks after the last teaching day (50%) Critical reflection of achievement of course objectives through classroom and assessment activities – 1000 words. Due two weeks after the last teaching day (20%) Hurdle Requirement: Attendance at a minimum of 80% is required to pass this subject.
