Subject Overview:	Tropical disease mostly occurs in low and middle income countries where health resources are generally constrained. Practitioners of tropical health must be equipped to meet the many challenges of practising in resource constrained settings and be ready to engage in innovative and effective responses. This 12.5-point subject is a core subject of the Postgraduate Diploma in Tropical Medicine and Hygiene (DTM&H). A range of presentations and interactive activities will cover: <ul style="list-style-type: none"> # disease surveillance, prevention and control, # outbreak investigation and response, # measuring health status of communities, # helping health workers learn, # district health systems and district services management, # management of small health facilities, # management of vaccine programmes, # issues of water, sanitation and hygiene (WASH), # maternal and newborn care (MNCH), and # management of undernutrition. <p>This subject will be taught on campus in block mode over 5 days.</p>						

Learning Outcomes:	By the end of this subject students will be able to: <ul style="list-style-type: none"> # design and implement strategies for disease monitoring, surveillance, prevention, investigation and control. # facilitate training and other methods to build capacity of health workers in resource-constrained settings. # describe systems of health specific to low and middle income countries.
Assessment:	Group oral presentation of 30 minutes: tropical health project designed for a resource-constrained setting. Groups of 4 – 5 students. Each student is to make equal contribution to the presentation - 25% MCQs and/or short answer questions – 1.5-hour examination - 25% Written assignment 2500 words - 50%
Prescribed Texts:	Students will be issued key readings for this subject.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Upon completion of this subject, students will have developed skills in: <ul style="list-style-type: none"> # Critical thinking and analysis # Working with others and in teams # Initiative, autonomy and organisation # Problem-solving # Oral communication # Finding, evaluating and using relevant information # Written communication # Decision-making # Leadership # Persuasion and argumentation # Using computers and relevant software
