<b>Subject Overview:</b>	Our planet faces significant challenges from global climate change, increasing natural disasters, urbanisation, population growth, intra-state conflict and poverty. The response to these challenges is largely implemented by the humanitarian sector. Within this sector, the provision of built environment facilities (e.g. schools, hospitals, shelter, water and sanitation, infrastructure etc) is critical. Such facilities are often implemented in complex and challenging contexts which extend the skills of those built environment professionals responsible for delivering them. This subject investigates the role of built environment professionals in the humanitarian sector. The topics covered include the global and regional humanitarian sector, the role of the built environment in the humanitarian sector, development / post-disaster / post-conflict reconstruction contexts, stakeholder equity and participation, monitoring and evaluation, building community capital and resilience, and pathways to working in the humanitarian sector.
<b>Learning Outcomes:</b>	<ul style="list-style-type: none"> <li># to understand the humanitarian sector;</li> <li># to understand the role of the built environment within the humanitarian sector;</li> <li># to appreciate the complexity of delivery of built environment infrastructure in the humanitarian context;</li> <li># to understand how the built environment can contribute toward community capital and resilience;</li> <li># to identify pathways to working in the humanitarian sector.</li> </ul>
<b>Assessment:</b>	One assignment to the equivalent of 1500 words (35%) due mid semester. One assignment to the equivalent of 3000 words (65%) due end of semester.
<b>Prescribed Texts:</b>	None
<b>Breadth Options:</b>	This subject is not available as a breadth subject.
