Subject Overview:	<p>This subject considers the production of architecture in the age of commodification. It considers the place of architecture in a world that is growingly preoccupied with the visual and the culture of consumerism. It reflects on how such a world conceives, experiences and consumes architectural design as spectacle, placing striking visuality and iconography above other design intentions. Colonial imagining of otherness, nation building, heritage conservation, tourism industry, popular culture and media, as well as the branding practice of the 21st century will be considered as the broader political and social contexts in which the conception of architecture as spectacle arises.</p> <p>Through a variety of case studies — ranging from the architecture of national pavilions at the world exposition series, the signatory works of 21st century's star architects and their shaping of the image of the global cities, the strategic use of architecture in promoting place identity, arts, and heritage, to the commercial architecture of shopping malls, entertainment centres, and international franchise brands — we will reflect on, not only the commodification of architecture, but also how architectural design operates as a medium of commodification of culture, heritage, memory, and otherness. The subject will also explore the extent to which the notion of architecture as spectacle has infiltrated the space of everyday life, the house and the perception of urban life in general. We will then ponder on the effects of the commodification of architecture in the way we experience and shape our built environments.</p>								

Learning Outcomes:	<p>On the completion of the subject, students should be able to:</p> <ul style="list-style-type: none"> • interpret architecture as a form of cultural production in which design ideas are shaped by, and subsequently giving shape to, broader cultural conceptions such as identity, otherness, memory, authenticity and difference; • analyse the effects of commodification and consumerism on the production and reception of architectural design in the 21st century; • critique contemporary architecture while drawing from broader social theories and interdisciplinary criticism of the popular culture of the 21st century; • develop a critical view on the commodification of 21st century built environment and apply it in design work.
Assessment:	Tutorial attendance (minimum attendance of 75% of classes) Weeks 1-12, Hurdle Tutorial presentations (based on visual and written materials to the total equivalent of 1000 words), due weeks 4-7, 20% Annotated bibliography and essay outline (1000 words) due week 8, 20% Research essay (3000 words), due week 12, 60%
Prescribed Texts:	Subject reader
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Critical reading skills, oral and visual presentation skills, research skills, essay writings, engagement with interdisciplinary works.
