<b>Subject Overview:</b>	This subject introduces a wide range of anthropological interests in the human body from a comparative ethnographic perspective. It considers topics such as body image and eating disorders, gendered bodies, body modifications and decorations, consciousness and the body/mind continuum, commodified bodies, disabled bodies and body healing. We will investigate how the human body is individually and culturally constructed and socially experienced through a critical examination of a range of ethnographic and theoretical literature, as well as through exploratory field research.									
<b>Learning Outcomes:</b>	On completion of this subject students should: <ul style="list-style-type: none"> <li># Appreciate how a critical comparative perspective and a tradition of ethnographic enquiry can inform developments in theories of the body.</li> <li># Articulate an understanding of a range of debates on the relations between bodies, minds, and the social, cultural and physical environments in which they circulate.</li> <li># Be able to communicate effectively in a variety of written and oral formats.</li> <li># Work reflexively and independently to appreciate the huge diversity of bodies in the world as well as a large (and sometimes challenging) range of beliefs, ideas and experiences people have with bodies and their parts.</li> </ul>									

<b>Assessment:</b>	A 1500 word report (40%) due during the semester. A 2500 word essay (60%) due during the examination period. Hurdle requirement: Students must attend a minimum of 75% of tutorials in order to pass this subject. All pieces of written work must be submitted to pass this subject.
