

ECOM90002 Econometrics

Credit Points:	12.5						
Level:	9 (Graduate/Postgraduate)						
Dates & Locations:	2016, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus.						
Time Commitment:	Contact Hours: Two 1-hour lectures and a 1-hour tutorial/practice class per week. Total Time Commitment: Estimated total time commitment of 120 hours per semester						
Prerequisites:	Introductory Econometrics or equivalent.						
Corequisites:	None						
Recommended Background Knowledge:	None						
Non Allowed Subjects:	<p>ECOM30002 Econometrics</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>ECOM30002 Econometrics</td> <td>Semester 1</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	ECOM30002 Econometrics	Semester 1	12.50
Subject	Study Period Commencement:	Credit Points:					
ECOM30002 Econometrics	Semester 1	12.50					
Core Participation Requirements:	<p><p>For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.</p> <p>It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http://services.unimelb.edu.au/disability</p></p>						
Contact:	<p>David Harris Harris.D@unimelb.edu.au (mailto:Harris.D@unimelb.edu.au)</p>						
Subject Overview:	<p>Extensions of the multiple regression model are examined. Topics include non-linear least squares, maximum likelihood estimation and related testing procedures, generalised least squares, heteroskedasticity, autocorrelation and models with stochastic regressors. Limited dependent variable models and issues involving time-series data are introduced. Theoretical concepts are illustrated by applied examples. The computer software used is EViews.</p>						
Learning Outcomes:	<p>On successful completion of this subject students should be able to:</p> <ul style="list-style-type: none"> # Explain the concept of maximum likelihood estimation; # Use the EViews software program to find maximum likelihood estimates for nonlinear models, heteroskedastic and auto-correlated error models, seemingly unrelated regressions, binary choice and limited dependent variable models; # Interpret EViews output and place that interpretation in an economic context relevant to the model being estimated; # Explain the difference between the Wald, likelihood ratio and Lagrange multiplier testing procedures; # Use EViews output to perform tests for a variety of hypotheses; # Explain the concepts of endogeneity, instrumental variable and method of moments estimation and simultaneous equations models; # Use EViews to estimate simultaneous equation models and interpret the output; 						

	<ul style="list-style-type: none"> # Explain the time series concepts of stationarity, spurious regression, unit root tests and cointegration; # Describe each of the models studied in the subject, the characteristics of these models and the data for which they are suited; # Derive basic results related to each of the models.
Assessment:	Two hour end-of-semester examination (65%); 2000 word group project due in Week 9 (20%); Four 5-page homework tasks due in weeks 3,4,5 and 6 (10%); and A mid-semester test due week 7 (5%-week 7).
Prescribed Texts:	You will be advised of prescribed texts by your lecturer.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>On successful completion of this subject, students should have improved the following generic skills:</p> <ul style="list-style-type: none"> # Evaluation of ideas, views and evidence; # Synthesis of ideas, views and evidence; # Strategic thinking; # Critical thinking; # Application of theory to economic policy and business decision making; # Summary and interpretation of information; # Using computer programs; # Statistical reasoning; # Problem solving skills; # Collaborative learning and teamwork; # Written communication.
Notes:	Students may not gain credit for both ECOM90002 Econometrics and ECOM30002 Econometrics.
