Subject Overview:	<p>Aims</p> <p>Strategic alignment of ICT and business is critical to the competitive positioning of organisations. ICT governance deals with all aspects of the formulation and implementation of ICT management plans, including ICT strategic plans. This subject discusses approaches to the formulation and development of ICT strategies. Topics covered include analysing an organisation's operating model, ICT governance arrangements and ICT governance policy framework, and maturity in the adoption of enterprise architectures. Students are expected to become familiar with current ICT governance frameworks and their implications for developing ICT governance plans.</p> <p>Indicative Content</p> <p>Topics covered in the subject include: critical and strategic thinking, modes of strategic planning, ICT strategic frameworks, ICT Governance frameworks, ICT Governance policy documents, ICT Governance design frameworks, ICT Governance arrangements, models of organisational decision making, operating models, relationship of ICT Governance design to the development of enterprise architectures, ICT Governance design methodologies, and value creation through ICT Governance design and implementation.</p>								

Learning Outcomes:	<p>Intended Learning Outcomes (ILOs)</p> <p>On completion of this subject the student is expected to:</p> <ol style="list-style-type: none"> 1 Engage in the process of ICT strategic planning and the critical review of ICT strategic plans 2 Demonstrate an understanding of the roles of ICT strategic planning in the formulation of ICT governance plans 3 Apply the principles and methodologies found in current ICT governance frameworks to the development of ICT governance plans for an organisation 4 Critically analyse the ICT plans of an organisation to determine of maturity of ICT strategic planning and governance within that organisation 5 Demonstrate an understanding of the relationships between ICT governance planning and the development of an enterprise architecture.
Assessment:	<p>One individual analysis report of an ICT strategic plan (40%) due mid semester. Addresses Intended Learning Outcomes (ILOs) 1 and 4 are addressed in the analysis report One group report, comprising of development of an ICT governance plan (60%) and a group presentation (10%) due at the end of semester. ILOs 2, 3 and 5 are addressed in the group report and presentation.</p>
Prescribed Texts:	<p>There are no prescribed texts for this subject. Readings will be provided on the LMS. Available rich case studies will also be used throughout the subject.</p>
Breadth Options:	<p>This subject is not available as a breadth subject.</p>
Fees Information:	<p>Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees</p>
Generic Skills:	<p>On completion of this subject, students should have developed the following generic skills:</p> <ul style="list-style-type: none"> # Literature searching and analysis # Critical and strategic thinking # Case study analysis # Independent learning # Team work # Report writing
Links to further information:	<p>http://www.cis.unimelb.edu.au</p>
Notes:	<p>Learning and Teaching Methods</p> <p>The subject is delivered in 4 hour classes, with a range of lectures, tutorial and workshop style teaching, as a whole class, individually and in small groups. Outside class students are expected to read supporting material and cases, and work together in small group-related activities.</p> <p>Indicative Key Learning Resources</p> <p>A range of reading material, including articles and case studies will be cited and made available electronically during the course.</p> <p>Careers/Industry Links</p> <p>This subject is relevant to careers as IT managers, IT investment planners, IT consultants and IT strategists. The two assessment components require the students to analyse business case studies from their own selected fields of interest.</p>
