

PATH30001 Mechanisms of Human Disease

Credit Points:	12.5															
Level:	3 (Undergraduate)															
Dates & Locations:	2016, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus.															
Time Commitment:	Contact Hours: 36 lectures (3 per week) Total Time Commitment: 170 hours															
Prerequisites:	<p>B. Science students: Both</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>PATH20001 Exploring Human Disease - Science</td> <td>Semester 2</td> <td>12.50</td> </tr> <tr> <td>BCMB20002 Biochemistry and Molecular Biology</td> <td>Semester 1, Semester 2</td> <td>12.50</td> </tr> </tbody> </table> <p>B. Biomedicine students:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>BIOM20001 Molecular and Cellular Biomedicine</td> <td>Semester 1</td> <td>25</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	PATH20001 Exploring Human Disease - Science	Semester 2	12.50	BCMB20002 Biochemistry and Molecular Biology	Semester 1, Semester 2	12.50	Subject	Study Period Commencement:	Credit Points:	BIOM20001 Molecular and Cellular Biomedicine	Semester 1	25
Subject	Study Period Commencement:	Credit Points:														
PATH20001 Exploring Human Disease - Science	Semester 2	12.50														
BCMB20002 Biochemistry and Molecular Biology	Semester 1, Semester 2	12.50														
Subject	Study Period Commencement:	Credit Points:														
BIOM20001 Molecular and Cellular Biomedicine	Semester 1	25														
Corequisites:	None															
Recommended Background Knowledge:	Students who do not have the Biochemistry prerequisites will be considered for entry into this subject on a case-by-case basis if they have appropriate marks in equivalent biomedical subjects.															
Non Allowed Subjects:	None															
Core Participation Requirements:	<p><p>For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.</p> <p>It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http://services.unimelb.edu.au/disability</p></p>															
Coordinator:	Assoc Prof Fred Hollande, Dr Theo Mantamadiotis															
Contact:	<p>Subject Coordinators Dr Theo Mantamadiotis theom@unimelb.edu.au (mailto:theom@unimelb.edu.au) A/Prof Frederic Hollande frederic.hollande@unimelb.edu.au (mailto:frederic.hollande@unimelb.edu.au) Administrative Coordinator BiomedSci-AcademicServices@unimelb.edu.au (mailto:BiomedSci-AcademicServices@unimelb.edu.au)</p>															

Subject Overview:	<p>This subject extends the concepts and examination of disease commenced in second year Pathology (PATH20001, BIOM20001) with a focus on the following areas: cellular and molecular aspects underlying fundamental pathogenic mechanisms in organ specific pathologies.</p> <p>This subject is available to both B.Science and B.Biomedicine students.</p> <p>Science and Biomedicine students intending to take a major in Pathology are required to enroll in PATH30001 (this subject), PATH30002 and PATH30003.</p> <p>Biomedicine students intending to take the Defence & Disease major MUST consult the Major Information Booklet.</p>
Learning Outcomes:	<p>On completion of this subject students should have:</p> <ul style="list-style-type: none"> • extended and deepened their understanding of the fundamental concepts involved in pathology, begun in second year. • developed an understanding of the cellular and molecular bases of a variety of disease processes and their relationship to normal cellular and molecular structure and function.
Assessment:	<p>Two multiple choice question tests during the semester (20% each); A 3 hour written examination in the examination period (60%).</p>
Prescribed Texts:	<p>Kumar V. et al., Robbins and Cotran Pathologic Basis of Disease, latest edition, Saunders Elsevier.</p>
Breadth Options:	<p>This subject is not available as a breadth subject.</p>
Fees Information:	<p>Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees</p>
Generic Skills:	<p>At the end of this subject students should have developed the following skills:</p> <ul style="list-style-type: none"> • the ability to understand and link complex overlapping and related ideas. • the ability to source, organise, read and understand reference material which covers a wide range of related and diverse topics about disease.
Notes:	<ul style="list-style-type: none"> # Science students who do not want to do a Major in Pathology and do not have the Biochemistry prerequisites will be considered for entry into this subject on a case-by-case basis if they have appropriate marks in equivalent biomedical subjects. # This subject is available to both B.Science and B.Biomedicine students.
Related Majors/Minors/Specialisations:	<p>Animal Cell Biology (specialisation of Cell and Developmental Biology major) Cell Biology (pre-2008 Bachelor of Science) Human Structure and Function Immunology Microbiology Pathology Reproduction and Development (specialisation of Cell and Developmental Biology major) Science-credited subjects - new generation B-SCI and B-ENG. Selective subjects for B-BMED</p>
