

PC-VPHEAD Postgraduate Certificate in Veterinary Public Health (EAD)

Year and Campus:	2016
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Level:	Graduate/Postgraduate
Duration & Credit Points:	50 credit points taken over 12 months
Coordinator:	Dr Simon Firestone
Contact:	<p>Faculty of Veterinary and Agricultural Sciences The University of Melbourne Victoria 3010 Australia</p> <p>Email: vet-publichealth@unimelb.edu.au (mailto:veter-publichealth@unimelb.edu.au)</p> <p>Currently enrolled students: Contact Stop 1 (http://students.unimelb.edu.au/stop1)</p>
Course Overview:	<p>The Postgraduate Certificate in Veterinary Public Health has been re-named Graduate Certificate in Veterinary Public Health from 2015. New students will not be admitted to the Postgraduate Certificate. Students interested in studying this program should refer to the Graduate Certificate in Veterinary Public Health (.../view/current/GC-VPHEAD) .</p> <p>The Postgraduate Certificate in Veterinary Public Health (Emergency Animal Diseases) comprises the first four subjects of the Master of Veterinary Public Health (Emergency Animal Diseases). The Graduate Certificate and the Graduate Diploma also represent early exit options from that Masters course.</p> <p>The Master of Veterinary Public Health (Emergency Animal Diseases) is an online Masters degree for veterinarians, animal scientists and animal health workers to enable them to work effectively in organised responses to emergency animal disease occurrences, in Australia and internationally.</p> <p>For the past 25 years the animal health and quarantine services in the Commonwealth and State governments have encouraged continuing education and have provided a number of short courses in "exotic" diseases for graduate veterinarians to promptly detect, control and eradicate newly introduced and other emergency diseases. This course will enhance and formalise this training and educational experience by providing co-ordinated and targeted modules to cover the skills that have been identified from experience in recent emergency diseases situations, such as Hendra virus infections and the 2007 outbreak of equine influenza in Australia.</p> <p>This course has been developed in direct partnership with CSIRO's Australian Animal Health Laboratory and the Victoria State Government's Department of Primary Industries. It has been tailored to suit experienced full time animal health professionals, expecting to remain in employment whilst studying part-time. The online method of delivery and broad range of elective topics will provide students with flexibility and allow them to manage their study commitments and educational needs.</p> <p>The first subject (VETS50003 Selection and Interpretation of Laboratory Tests) will be taught as a short residential course to cover hands-on experience and to personally introduce students to each other as well as to their future tutors and mentors to ensure that they are familiar with the resources and requirements of online learning.</p> <p>Other subjects in the Veterinary Public Health (Emergency Animal Diseases) program may be studied individually under the Community Access Program, without applying for the full program. Any such successfully completed subjects may later be credited towards the Master, Diploma or Certificate level degrees in Veterinary Public Health (Emergency Animal Diseases).</p>
Learning Outcomes:	<p>This course will reinforce and strengthen all the graduate attributes that will have already been achieved by the participants by way of their primary degree and work experience before enrolling in this postgraduate certificate course.</p> <p>Academic excellence will be fostered by utilising the high level professional skills of internationally recognised experts in technical content and adult learning.</p>

	<p>This course involves subject material across a wide range of disciplines including veterinary science, management, leadership, outbreak risk assessment, decision-making and communication. Participants in the course will be veterinarians, animal scientists and animal health professionals who are already in positions that bring them into professional contact with the general public and where they are involved in providing leadership in technical matters.</p> <p>This course specifically addresses issues of leadership development for responding to emergency situations in the community. Emergency diseases are often transboundary diseases, which are not confined by national borders and thus require multinational approaches to achieving their control.</p> <p>Working professionally across cultures and social groups is critical both at official levels and also at local levels to ensure community involvement in control programs. It is anticipated that this course will attract veterinarians, animal scientists and animal health professionals from around the world, including from developing countries, and cultural diversity will be deliberately used when assigning students to syndicate work projects.</p> <p>This course focuses on dealing with animal health issues that are global issues and which require global, regional and local approaches. It is expected that graduates will be prepared and sensitised to opportunities to work at a global, regional or local level, either within their own State or national agencies or through one of the many international veterinary and public health agencies and non-governmental organisations.</p>																								
Course Structure & Available Subjects:	This course requires completion of one compulsory subject plus three elective subjects, each worth 12.5 points.																								
Subject Options:	<p>The availability of each subject within a given year will depend on class enrolments. Refer to the Veterinary Public Health website (http://www.vet.unimelb.edu.au/mvph) for further information on recommended study plans and subject sequences.</p> <p>Compulsory subject</p> <table><tr><th>Subject</th><th>Study Period Commencement:</th><th>Credit Points:</th></tr><tr><td>VETS50003 Selection & Interpretation of Lab Tests</td><td>July</td><td>12.50</td></tr></table> <p>Elective subjects</p> <p>Select three of</p> <table><tr><th>Subject</th><th>Study Period Commencement:</th><th>Credit Points:</th></tr><tr><td>VETS50004 Communication in Disease Emergencies</td><td>August</td><td>12.50</td></tr><tr><td>VETS50005 Management in Disease Emergencies</td><td>April</td><td>12.50</td></tr><tr><td>VETS50006 Epidemiology of Epidemics</td><td>February</td><td>12.50</td></tr><tr><td>VETS50007 Emergency Animal Diseases 1</td><td>October</td><td>12.5</td></tr><tr><td>VETS50008 Emergency Animal Diseases 2</td><td>Not offered 2016</td><td>12.5</td></tr></table> <p>A number of the elective subjects have prerequisites.</p>	Subject	Study Period Commencement:	Credit Points:	VETS50003 Selection & Interpretation of Lab Tests	July	12.50	Subject	Study Period Commencement:	Credit Points:	VETS50004 Communication in Disease Emergencies	August	12.50	VETS50005 Management in Disease Emergencies	April	12.50	VETS50006 Epidemiology of Epidemics	February	12.50	VETS50007 Emergency Animal Diseases 1	October	12.5	VETS50008 Emergency Animal Diseases 2	Not offered 2016	12.5

Entry Requirements:	The Postgraduate Certificate in Veterinary Public Health has been re-named Graduate Certificate in Veterinary Public Health from 2015. New students will not be admitted to the Postgraduate Certificate. Students interested in studying this program should refer to the Graduate Certificate in Veterinary Public Health (../view/current/GC-VPHEAD) .																								
Core Participation Requirements:	<p><p>For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.</p> <p>It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this</p>																								

	subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http://services.unimelb.edu.au/disability
Graduate Attributes:	Graduates will have specialised knowledge and skills in a broad range of areas as required to fill a number of professional roles in emergency animal disease preparedness and response. Graduates will be aware of the epidemiological, economic, environmental, political, social and welfare factors behind outbreaks of emergency animal disease and disease emergence. The specialist skills and knowledge achieved will allow veterinarians and animal health professionals to provide advanced services in a broad range of aspects of emergency animal disease responses, in Australia and internationally.
Generic Skills:	<p>Upon completion of the Postgraduate Certificate in Veterinary Public Health (Emergency Animal Diseases), graduates should:</p> <ul style="list-style-type: none"> # Possess medium to high-level computing skills; # Apply critical and analytical skills to the identification and resolution of problems; # Communicate effectively; and # Have good time management skills.
Notes:	<p>Reliable internet access with at least a medium speed connection and a personal computer are essential for undertaking this online program. The content is accessed through your web browser. Microsoft Office™ and Adobe Acrobat Reader or equivalent software packages are necessary for assessment tasks, assignments and some class exercises.</p> <p>This course does not have a CRICOS code and will not enable a student to obtain a visa to study in Australia.</p>
