Subject Overview:	This subject addresses some of the central issues in the philosophy of science. It will raise questions such as: What is the difference between science and non-science? Is there a universal scientific method? Or do the methods employed by scientists vary historically? Is scientific theory change a rational process? Is science objective? Do scientific theories inform us of the truth about the world? Students who take this class will have knowledge of the major themes of recent and contemporary philosophical thinking about science. They will also have experience of the methods of critical analysis and argument employed in the philosophy of science and a background on which to base further study in the area.
Learning Outcomes:	Students who successfully complete this subject will: <ul style="list-style-type: none"> # gain a sound general comprehension of the major recent advances in our philosophical understanding of the nature and structure of science; # understand the roles of experience and reasoning in contributing to this structure; # display a familiarity with some key texts on which these advances are based; # have background in the philosophy of science on which to base further research and study in the area; # have experience with methods of critical analysis and argument employed in the philosophy of science, leading to improved general reasoning and analytical skills.
Assessment:	A 1500-word essay, due mid-semester (30%) A 2500-word essay, due in the examination period (70%) Hurdle requirement: Students must attend a minimum of 75% of tutorials in order to pass this subject. All pieces of written work must be submitted to pass this subject. Note: Assessment submitted late without an approved extension will be penalised at 10% per day. After five days late assessment will not be marked. In-class tasks missed without approval will not be marked.

Prescribed Texts:	Students will be presented with a list of readings, which will be available in a coursepack at the Co-op Bookstore.
Breadth Options:	<p>This subject potentially can be taken as a breadth subject component for the following courses:</p> <ul style="list-style-type: none"> # Bachelor of Biomedicine (https://handbook.unimelb.edu.au/view/2016/B-BMED) # Bachelor of Commerce (https://handbook.unimelb.edu.au/view/2016/B-COM) # Bachelor of Environments (https://handbook.unimelb.edu.au/view/2016/B-ENVS) # Bachelor of Music (https://handbook.unimelb.edu.au/view/2016/B-MUS) # Bachelor of Science (https://handbook.unimelb.edu.au/view/2016/B-SCI) # Bachelor of Engineering (https://handbook.unimelb.edu.au/view/2016/B-ENG) <p>You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.</p>
